Word help

Say it, point to the drawing, then use it in an explanation. You can plan in any language.

Tier and word	Meaning and example
Tier 2 · order	Put steps into a sequence. Copy before you separate.
Tier 2 · matching	Having the same relevant information or parts. Both new cells receive matching chromosome sets.
Tier 2 · predict	Use what you know to say what might happen. Predict the result of uneven separation.
Tier 2 · repair	Replace or mend something damaged. New body cells help replace damaged cells.
Tier 3 · cell cycle	The series of steps in which a cell grows and divides. The cell cycle includes interphase, mitosis and cytokinesis.
Tier 3 · interphase	The stage in which the cell grows and copies its DNA. The cell copies its DNA in interphase.
Tier 3 · mitosis	The stage in which copied chromosomes separate into two nuclei. Mitosis separates the chromosome sets.
Tier 3 · chromosome	A structure of DNA that carries genes. Each new nucleus receives a matching set of chromosomes.
Tier 3 · cytokinesis	The division of the cell after the nuclei form. Cytokinesis splits one cell into two.
Tier 3 · prophase	The mitosis phase when chromosomes condense. In prophase, chromosomes become easier to see.
Tier 3 · metaphase	The mitosis phase when chromosomes line up in the middle. In metaphase, chromosomes form a line.
Tier 3 · anaphase	The mitosis phase when the two copies of each chromosome are pulled to opposite ends. In anaphase, the two copies move to opposite ends.
Tier 3 · telophase	The mitosis phase when two new nuclei form. In telophase, each set gains a nucleus.

Sentence stems: First …; then …; last … . The daughter cells match because … .
