Reference A first cross

	A	a
a	Aa	aa
a	Aa	aa

In Aa × aa both rows read Aa then aa.

Reference only. The invented flower model uses A and a as alleles of the same gene.

Step	Check
Headings	A and a across the top. a and a down the side.
Pair	Use one allele from each heading.
Count	Two aa cells out of four. The chance is 1 in 2 for each offspring.

Made by Matt

Reference B second cross

	A	a
A	AA	Aa
a	Aa	aa

In Aa × Aa the rows are AA, Aa and Aa, aa.

Reference only.

Idea	Explanation
Aa × Aa	Both parents can pass A or a.
Chance of aa	One cell out of four.
Actual offspring	A group of four can have zero, one or more aa offspring. The model does not fix the count.

Arrival and exit Aspire

Use the picture on Reference A for question 1 and the model table for questions 2–4.

1. Which heading appears twice along the left edge?

2. Why do both side headings match?

3. How do you use the headings to fill one cell?

4. Does each cell count a real offspring?

Exit ticket

1. What is expected for Aa × Aa in 20 model draws?

2. Name a further check.

Pupil voice

What helped you most today, or what would you change next time?

Point, speak, sign, draw, write or choose. You may pass.

verbal · written · drawn · signed · symbol / choice-selected · demonstrated / re-attempt · adult-scribed. You may pass.

You do Aspire

Use your book or this sheet. Use Reference A and B. One response per task.

1. For Aa × Aa, give the expected aa count in 20 model draws. Explain.
Staff I ☐ S ☐ C ☐

---

2. Compare observed counts of four in 20 and six in 20 with that expectation.
Staff I ☐ S ☐ C ☐

---

3. Suggest a way to investigate a repeated difference between observations and the model.
Staff I ☐ S ☐ C ☐

Feedback and response · Aspire

Feedback codes

Code	Meaning
VF	Verbal feedback

My response

Record one response to feedback in your usual mode. You may pass.

Adult checks the response and ticks it, or writes R (Pupil responded to feedback).
