# Teacher and cover planner

## Entry requirements and my gaps

Tuesday 26 January 2027 · P3 · 40 minutes · Year A

Careers · BUILD · up to five learners · Spring 1 Week 4 · formative

Theme: Resilience & Change. Six-week term. Week 6 assessing; source Week 5 retains its mixed evidence role.

Thread tags: SMSC S/So (M/C: none); British Values IL/MR (D/RL/T: none).

## Weekly outcome

Students compare their current strengths/qualifications with a realistic course, training or job requirement.

## Exact lesson outcome

I can identify one requirement I already meet and one thing I may need to work on.

Source: BUILD Careers physical row 19 / Spring 1 row 4. E19 weekly outcome, F19 focus, G19 lesson outcome, H19 sequence, I19 timing and J19 evidence.

## What this lesson teaches

A requirement is something a role asks for. Match the exact requirement to evidence, then plan support. In this lesson a gap means something to check or practise, never a judgement of worth or a closed route. All job cards and the model person are invented. Generic qualification levels are practice details, not real recruitment rules.

## Success checks

Identify one requirement with a clear clue that it is met in this task. Identify one thing to check or practise and set a small target with help. Keep Shown here, Check and Next step distinct; do not guess about unknown records.

## Prepare

Books, pens, reusable job cards, Vocabulary Mat and evidence record. No real attendance or qualification records. The learner may point to or order words using usual aids; no objects, tools, food or gardening work. Confirm private help and supported pause/return. No internet, login or phone.

## Where this leads

This helps me notice what I can do and ask for help with a next step towards work or training.

# Forty minute sequence

| Phase | Min | Teaching |
|---|---|---|
| Arrival and retrieval | 5 | Recall that job cards can ask for different skills; use Week 3 or supply a model. |
| I Do | 8 | Pre-teach requirement and strength; model A and the three checklist states. |
| We Do | 10 | Match A to its evidence; plan support and check that unknown does not mean unable. |
| You Do | 12 | Choose B or C; try its short skill task, match evidence and choose one supported improvement target. |
| Review and exit | 5 | Check one evidenced strength and one next step; retain NS and reply; bank checklist and target. |

5 + 8 + 10 + 12 + 5 = 40 minutes, following I19. Processing time and brief pauses are included. Slides 7 and 8 share the 23–35-minute task window.

## Arrival and I Do

0–5: recall a Week 3 entry skill or supply the idea; requirements can differ. 5–9: read the exact outcome; teach requirement, strength, evidence, check and next step. 9–13: model A. The invented person asked for help, so attitude is Shown here. Skill is Next step: practise the three-step plan. Attendance and qualification are Check because facts are absent.

## We Do

13–19: match A's four requirements to its record and explain one clue. Offer two states at a time. Model a target naming the action, trusted adult, next lesson and all-three check. 19–23: private hinge on an unknown qualification. Re-model and use the parallel check if unclear. Never change unknown to unable.

## You Do

23–35: choose B stockroom or C garden. Try the short word-order task in a book, by pointing, typing or exact scribe. Use the supplied plan and usual aids. A correct order can evidence this classroom skill; record actual help and do not silently supply the answer. Build the four-row checklist. Attendance and qualification remain Check without private records. Mark attitude only if observed. Identify one shown requirement and one thing to check or practise further; choose a target with help, a time and a progress check.

## Review and exit

35–38: privately check evidence and target; give one NS and retain the reply. 38–40: show one strength and one supported next step. Bank the actual checklist and improvement target in Careers Portfolio. A model-only or unobserved response is partial evidence; allow another supported check later.

# Access and checks

## Supported

Read one requirement at a time. Keep the picture, plan, model and word bank. Offer two labels or two next steps. Point, sign, type or use an exact scribe. Usual aids stay available; record supplied answers.

## Independent

Choose B or C. Try the short skill task with usual aids, match the four requirements to what is known and identify one shown skill plus a next step. Keep the model and source card.

## Aspire

Explain why Check is different from not being able to do something. Make the target clearer by naming help, a time and how to check progress. No extra public speech or writing required.

## Model check and fade

A asked for help when a word was unclear. Which requirement has a clue? A ask for help; B qualification. Key A. Point to the record if unsure and model the match. Keep pictures, plan, words and normal aids; fade answer cues only.

## Hinge and parallel check

Main: we do not know the qualification. A rule out the route; B ask a trusted adult to help check. Key B. If unclear, contrast missing information with evidence. Parallel: a skill needs practice. A plan a small step with help; B give up the route. Key A. Recheck privately; pass is unobserved.

## Adaptations and prompt ladder

Cognition and Learning: four short fields, clear model and reduced-choice states. Communication and Interaction: one instruction, pre-taught words, processing time, frames and usual aid. SEMH: calm stages, choice, pass, supported pause/return; no cold calling. Sensory and Physical: large clear text/pictures, pointing instead of moving cards, no colour-only codes. EAL: plan in any language; read and explain requirement words.

Prompt ladder: 1 point to place/instruction; 2 ask a short question; 3 rephrase; 4 provide scaffold/choice; 5 model the first step only, then return task. I Do: locate the clue. We Do: prompt a state choice. You Do: record actual skill evidence and help without completing the checklist for the learner.

## Private help route

Use a trusted adult or the school’s help route. Point to HELP, write a request or ask for a private talk. Pass, pause and supported return are available. If one adult is busy, seek another through the route. No personal grades, attendance history, family jobs or finances requested.

# Evidence and staff guidance

## Typed and scribed routes

Either choice can use Evidence Sheet page 2, Type instead, with blank fields. Save through the usual routine with lesson code and work reference; show an adult privately. Exact scribe records words/selections, reads back and allows correction. Separate usual access from supplied answers.

## Evidence and judgement

Exact source evidence: Requirement-match checklist and one improvement target. Keep selected card, actual ordered response, all four states, one shown requirement and clue, one thing to work on, target/help/time/check, access, prompts, first response, one NS and reply. Judge evidenced strength and next-step identification separately. Usual aids are allowed by the invented skill requirement. Supplied answers do not prove the skill; keep partial evidence and arrange another supported attempt. This is classroom evidence, not proof of real job eligibility.

## Misconceptions and feedback

Unknown does not mean unable. One thing to work on does not close a route. A qualification level on an invented card is not a rule for every job. A completed class task does not prove attendance or a qualification. Shown here records a limited observation; further practice can still be useful.

One NS may add a source clue or make the next step small and checkable. VF verbal feedback; WS worked with support; I independent; // self-edit; ? read back; E actual banked evidence. R follows Voice, Audience, NS and reply in the same colour, on the same page or usual mode. Offer to the Communication portfolio. Staff confirm any accredited mapping.

## Invented cards and boundaries

All jobs, requirements and the model person are invented. Role types only; no employer, provider, exam board, qualification title or place named. No real entry policy, vacancy or learner record asserted. Do not ask for personal qualifications or attendance. A learner can choose a check as their next step. Staff check actual requirements and available support before real decisions. Listen calmly to concerns, avoid probing or secrecy promises and follow usual procedures.

## Source and sequence

H19 requirement matching and target retained. Its RAG checklist uses three labelled states: S Shown here, ? Check, N Next step, with no colour-only meaning or deficit labels. Review is private; K19 websites become prepared cards. Next BUILD Careers Weeks 5–6, one per return; then previously queued LAUNCH Careers Week 1. Further GROW Careers paused. Only Week 4 authored; pause for Downloaded.
