

Kitchen hygiene and safety

Today: get ready, spot a hazard and rehearse one tool skill.

Choose a maker, reader, observer or recorder role. You may ask for a pause.

What makes a team ready to begin?

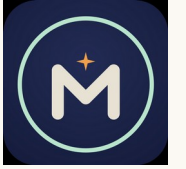

Words that help

HYGIENE

Actions that help keep food and equipment clean.

HAZARD

Something that could cause harm.

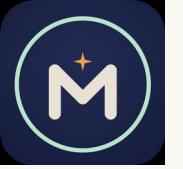

A clean-looking table?

A table looks clear, but someone has just put a used tissue on it.

The fruit will be eaten without cooking.

Is looking clean enough?

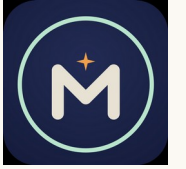

Our ready routine

Secure hair and clothing; apron on. Wash all parts of hands with soap for at least 20 seconds, rinse and dry.

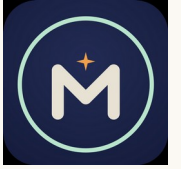

Use a clean, clear surface, stable board and clean tools.

Check the actual food labels and agreed plan with the adult.

Our ready routine — continued

What do you do after touching your nose?

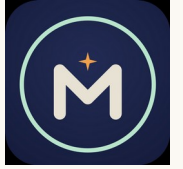

A tool has a safe place

Use only the agreed tool at your supervised station. Keep the board stable.

If a sharp tool needs moving, put it flat in its safe place and ask the adult.

Never pass a knife hand to hand or leave it hidden in a sink.

Someone asks you to carry a knife across the room. What next?

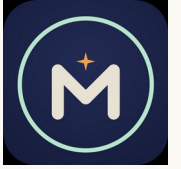

Watch: slice, pause, park

Adult models a soft banana with an approved table knife on a stable board.

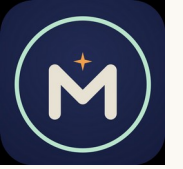

Watch the agreed holding method, fingers clear and small controlled movements.

Set the tool flat in its safe place before speaking or changing tasks.

Watch: slice, pause, park — continued

Which part will you practise or describe?

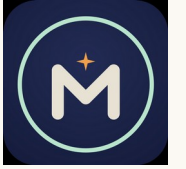

Ready, pause or ask?

A: Clean hands, stable board and adult ready.

B: A used yoghurt spoon is offered to someone avoiding milk.

C: A spill appears beside the station.

Sort A, B and C. Give the next action.

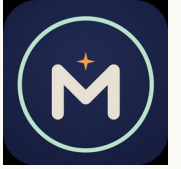

Safety circuit

Station 1: demonstrate or direct the handwash routine.

Station 2: rehearse the agreed tool action or narrate the adult's model.

Station 3: choose a hazard card and explain the safe fix.

Can your observer name one safe action you used?

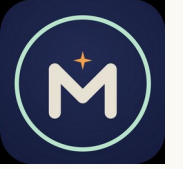

Record the process

Mark what you showed, what was prompted and what needs another practice.

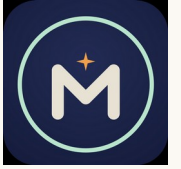

Give one reason using: “We do this because...”

Reset: tools accounted for, surfaces cleaned and hands washed.

Record the process — continued

Which action would you repeat next session?

Stop is a useful skill

You find a knife under bubbles in the washing-up bowl.

What is the safe next action?
