

Identity, stereotypes and opportunity

How can we challenge assumptions and investigate real barriers?

I can identify stereotypical thinking and explain why career choices should be based on evidence, interests and capability.

Use your own safe examples or the fictional case. Share only what you choose.

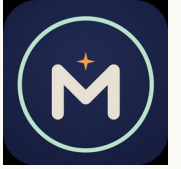

Words that help

STEREOTYPE

A fixed assumption about a group of people.

BARRIER

An obstacle that makes access or participation harder.

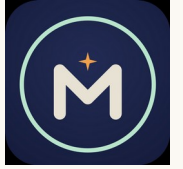

Start here

A learner has no suitable bus route to a course.

Someone says the course is “not for people like you”.

What is different about these statements?

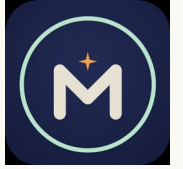

Separate the issue, choose a response

Stereotype: replace group assumptions with individual evidence.

Requirement: check the actual role or provider information.

Barrier: investigate support or alternatives; do not assume a solution exists.

Can a stereotype also create a barrier?

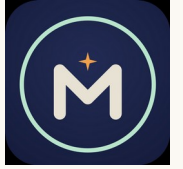

Kai's vehicle-maintenance enquiry

Kai enjoys fault-finding and follows a checking sequence in practical tasks.

The provider is difficult to reach by public transport.

A comment says: "That course is not for people from your background."

Name the assumption, the barrier and the relevant evidence.

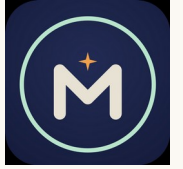

Plan without guessing

Ask the provider about times, route options and any available travel support.

Ask a careers adviser about comparable providers or routes.

Keep the answer unknown until someone confirms the details.

Which response makes an unsupported promise?

A requirement is not a stereotype

A: this named course lists a qualification not yet achieved.

B: people of one gender cannot learn these skills.

How would your response differ?

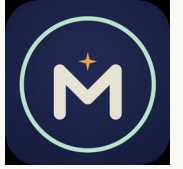

Your three tasks

1. Classify and justify: Use stereotype / requirement / barrier; overlap is allowed if explained.
2. Rewrite an assumption: Choose one supplied example and replace the assumption with fair evidence-based reasoning.
- 3. Make a barrier enquiry plan: Use Kai's full card. State obstacle, possible questions and who could confirm an answer.**

Your three tasks — continued

Use the worksheet and resource cards. Work one task at a time.

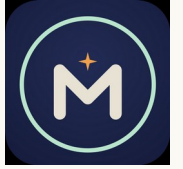

Check and improve

I can identify the group assumption in a stereotype.

I can distinguish a stereotype, a requirement and an access barrier.

I can suggest an evidence-based response without promising a solution.

Choose one part to make clearer. Which detail supports your answer?

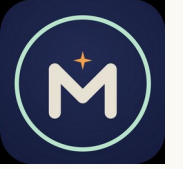

Save your evidence

Stereotype/barrier reflection and role-model note.

Mark the work: my own example / fictional case analysis.

Keep one question open for your next lesson.

Which piece shows today's learning?

Exit check

Give one stereotype, one real barrier and a sensible next question.

Answer using words, pointing, a sketch or a private adult conversation.
