

Test materials and joins

Autumn 1 · Lesson 5 · Which material and join fit the job?

Name (optional): _____ Date: _____

Show your ideas by writing, drawing, pointing or speaking. An adult can record your words.

1. Property evidence

Use sample B: soft, opaque, flexible, cut edge stayed together. Sample E: see-through holes, flexible.

- Name two properties of B.
- Name one property of E.
- Which better suits a card pocket? Give a reason.

2. Read repeated results

These are sample data. At the same load/time: glue held, held, held; tape opened, held, opened; stitch held, opened, held.

- Count successful tests for each method.
 - Which gave the most consistent result here?
 - Does this prove that method is always strongest?
-

My learning record

Lesson 5 · Continue your thinking

3. Choose with a reason

Use the join cards and name further evidence where needed.

- A temporary paper display needs a quick join.
- A bag handle will carry items repeatedly.
- Fresh glue has not had the label's curing time.

Useful words

property: A feature of a material that can be observed or tested. / join: A connection between two pieces. / overlap: The area where one piece lies on another. / fair test: A comparison that keeps relevant conditions consistent.

Exit check

What is the difference between a made join and an inspected join?

My next step

One thing I can practise or improve:

Adult record: response method _____ support _____ evidence _____

Design for a user

Autumn 1 · Lesson 6 · Can someone make the item from my plan?

Name (optional): _____ Date: _____

Show your ideas by writing, drawing, pointing or speaking. An adult can record your words.

1. My user and brief

Choose Alex: spot pocket quickly, or Rowan: quiet simple design. Use the supplied pocket brief or state the flat-decoration alternative.

- Who is the design for and what is its job?
- Name two checks your item must meet.
- Which printed idea inspired you, and what did you change?

2. Label a workable design

Draw, trace, dictate or label the pattern for your chosen item.

- Name the fabric or model material; add a useful property.
- Pocket: blank 100 × 170 mm; folds 30 mm and 100 mm from the top; two 10 × 70 mm side joins; opening stays clear.
- Flat decoration: backing 100 × 70 mm; front 60 × 50 mm; centre the front and use two 10 × 50 mm side joins. No folds or opening.
- Show the front symbol or stripe, clear of the joins.

My learning record

Lesson 6 · Continue your thinking

3. Make an ordered plan

Number these actions, then name one partner-check improvement.

- Test the item when its joins are ready: pocket card cycles or gentle decoration lifts.
- Check plan, materials and approved tools.
- Pocket: practise folds without tape. Decoration: centre the front panel without tape.
- Apply the correct side tape, assemble and press as instructed.
- Decorate the front and allow required drying/handling time.

Useful words

brief: The job and checks that a design must satisfy. / prototype: A first version made to explore and test a design. / allowance: Extra space reserved for a join or construction step. / dimension: A measured length, width or height.

Exit check

Why should a pocket's opening be marked on its plan?

My next step

One thing I can practise or improve:

Adult record: response method _____ support _____ evidence _____

Make, test and improve

Autumn 1 · Lesson 7 · Does my textile item meet its brief?

Name (optional): _____ Date: _____

Show your ideas by writing, drawing, pointing or speaking. An adult can record your words.

1. My construction record

Use your real work or clearly label “paper model” or “fictional record”.

- I made / modelled / inspected...
- One planned dimension or fold I checked was...
- One safe making action and the support used were...

2. Test against the brief

Use your results, or Sample B: pocket 100 × 70 mm, card fits, left join opens on cycle 2, stripe clear. A decoration instead needs centred panels and 3 gentle lift checks.

- Size and pocket card fit / decoration panel position: met / not yet / need evidence, because...
- Both joins through 3 checks: met / not yet / need evidence, because...
- Clear front symbol: met / not yet / need evidence, because...

My learning record

Lesson 7 · Continue your thinking

3. Improve and retest

Complete an evidence-based next step.

- My issue or missing check is...
- One change I would make is...
- I would retest by...
- If the repair needs more cure time, I will...

Useful words

construct: Put the planned parts together. / criterion: One check in the design brief. / evaluate: Judge how well the item meets its stated checks. / retest: Repeat a check after making a change.

Exit check

What is a useful improvement?

My next step

One thing I can practise or improve:

Adult record: response method _____ support _____ evidence _____
