Using digital mapping and GIS

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

Staff card

Staff print card

3 November 2026

Invite a response. Give thinking time. The learner may pass.

Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Code	Meaning
VF	Verbal feedback
WS	Worked with support
I	Independent
NS + …	Next step
E	Evidence captured
R	Pupil responded to feedback
//	Self-edit point
?	Read this back to me

At check-out, record E for … against the pupil's target.

Mark R only after the pupil has responded to feedback with an adult.

Return-to-learning route for this lesson: after a pause, rejoin Supported with one reference point and the layer key.

Soft instrumental music for transitions if the class plan says so

Sound is off by default.

Pupils edit in the same colour, on the same page.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

P17 · SLT planning and evaluation

Use digital mapping or GIS to describe a place.

Stage	Minutes
Arrival including opening	4
Starter	3
I do	6
We do shared investigation	7
We do decision checkpoint	2
You do	12
Review and improve	3
Exit ticket	3

Planned adaptations

Need	Plan
Read or sequence	Use one card and one short instruction.
Communicate	Allow a private point, sign, spoken answer or exact scribing.
Pause and return	Return-to-learning route for this lesson: after a pause, rejoin Supported with one reference point and the layer key.
Access the drawing	Use the larger view or describe the marked features.

Catch-up embedded this lesson: revisit symbols and grid references in Starter.

If behind

Keep one model clue, one shared check, the checkpoint, a book response and the exit. Shorten repeated practice.

Staff evaluation

Evidence, adaptation and next teaching move

Made by Matt

P18 · Individual target opportunities

Use the learner’s actual agreed target.

Opportunity	Evidence	Actual support
Find a clue	Select a card detail.	_____
Explain	Link evidence to the answer.	_____
Check	Keep or revise one detail.	_____
Regulate	Use a pause or a private response.	_____

The teacher models one step. A second adult, if available, reads a card or records the exact response. With one adult, set out the card and return for the pupil’s reason.

Give time, point to a clue, ask a short question, then offer a frame or choice. Invite a response. The learner may pass.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

First lesson back · once-only read

Check what pupils can show from the previous lesson and revisit it within the planned stage.

Use the supplied examples. Invite a response, give thinking time and allow a pass. Use only the learner’s own evidence.

Made by Matt

Teacher answers · Arrival

Arrival · Supported

Point to the picture that matches the top one.

The lower left picture matches the top one.

Arrival · Supported

Which meaning fits settlement?

A place where people live

Arrival · Supported

What does a GIS layer do?

It displays a selected type of spatial information over a map.

Arrival · Supported

Can building outlines alone establish population density?

No. People-per-area data would also be needed.

Arrival · Independent

Point to the picture that matches the top one.

The lower left picture matches the top one.

Arrival · Independent

Which meaning fits settlement?

A place where people live

Made by Matt

Arrival · Independent

What does a GIS layer do?

It displays a selected type of spatial information over a map.

Arrival · Independent

Can building outlines alone establish population density?

No. People-per-area data would also be needed.

Arrival · Aspire

Point to the picture that matches the top one.

The lower left picture matches the top one.

Arrival · Aspire

Use settlement in an accurate example.

A settlement is a place where people live. The larger town centre used for the map comparison in Card D is part of a settlement.

Arrival · Aspire

What does a GIS layer do? Which detail supports your answer?

It displays a selected type of spatial information over a map. On the supplied map, the roads layer shows routes, while the buildings layer shows outlines.

Arrival · Aspire

Can building outlines alone establish population density?

No. People-per-area data would also be needed.

Made by Matt

Starter

What do you notice in the drawing?

Roads is linked to routes.

Starter

What does a GIS layer do?

It shows one type of information on a map.

Starter

What does a GIS layer do?

It shows one type of information on a map.

Starter

Can building outlines alone establish population density?

No. You also need to know how many people live in the area.

I do · 1

What does a GIS layer do?

It shows one type of information on a map.

I do · 1

Which source helps us begin?

Use card A. The station and the local landmark help you find your position.

Made by Matt

I do · 2

Which detail in the card can help with the question?

The station and the local landmark help you find your position.

I do · 2

What does this clue help us say?

The road layer shows routes. The building layer shows outlines.

I do · 3

How could I explain the link?

Compare the same area with layers on and off.

I do · 3

How can I start my answer?

The source shows ____. This helps me explain ____.

I do · 4

Can building outlines alone establish population density?

No. You also need to know how many people live in the area.

I do · 4

What is one limit to keep in mind?

A layer only shows what its source records.

Made by Matt

We do

What does a GIS layer do?

It shows one type of information on a map.

We do

Which clue supports your answer?

A GIS layer shows one type of map information. For example, the roads layer shows routes separately from the building outlines.

We do

Can building outlines alone establish population density?

No. You also need to know how many people live in the area.

We do

Which clue will you use?

No. The buildings layer shows outlines. To find population density, you also need a count of people and the size of the area.

We do

What is one limit?

A layer only shows what its source records.

We do decision checkpoint

Which choice fits the evidence?

Where the roads run.

Made by Matt

We do decision checkpoint

What evidence helps you decide?

The layer shows mapped routes. Population or causes need other evidence.

Made by Matt

Teacher answers · You do

You do · Supported

Check the detail you used.

The station and the local landmark help you find your position.

You do · Supported

Check your reason or limit.

The road layer shows routes. The building layer shows outlines. A layer only shows what its source records.

You do · Independent

Check the detail you used.

The station and the local landmark help you find your position.

You do · Independent

Check your reason or limit.

The road layer shows routes. The building layer shows outlines. A layer only shows what its source records.

You do · Aspire

Check the detail you used.

The station and the local landmark help you find your position.

You do · Aspire

Check your reason or limit.

The road layer shows routes. The building layer shows outlines. A layer only shows what its source records.

Made by Matt

You do · Choice

Check the detail you used.

The station and the local landmark help you find your position.

You do · Choice

Check your reason or limit.

The road layer shows routes. The building layer shows outlines. A layer only shows what its source records.

Made by Matt

Review and improve

Is my detail accurate?

The station and the local landmark help you find your position.

Review and improve

Does my reason follow from the source?

The road layer shows routes. The building layer shows outlines.

Review and improve

What could I check or change?

A layer only shows what its source records. Edit in the same colour, on the same page.

Exit · Supported

What does a GIS layer do?

It shows one type of information on a map.

Exit · Supported

Can building outlines alone establish population density?

No. You also need to know how many people live in the area.

Exit · Independent

What does a GIS layer do?

It shows one type of information on a map.

Made by Matt

Exit · Independent

Can building outlines alone establish population density?

No. You also need to know how many people live in the area.

Exit · Aspire

What does a GIS layer do? Use one clue.

A GIS layer shows one type of information on a map. The roads layer on this map shows routes, and the buildings layer shows outlines.

Exit · Aspire

Can building outlines alone establish population density?

No. You also need to know how many people live in the area. A layer only shows what its source records.

Exit · Choice

Point, draw, sign or tell an adult. What does a GIS layer do?

It shows one type of information on a map.

Exit · Choice

Can building outlines alone establish population density?

No. You also need to know how many people live in the area.

TA Brief

Use digital mapping or GIS to describe a place.

Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Use the supplied examples. Invite a response, give thinking time and allow a pass. Use only the learner’s own evidence.

Return-to-learning route for this lesson: after a pause, rejoin Supported with one reference point and the layer key.

Optional: show one map comparison to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help.

Use one route. Record only the pupil’s own response and the support given. Next lesson: Settlement and urbanisation.

At check-out, record E for … against the pupil's target.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

Teaching script · Arrival including opening

Use one Arrival route. Let pupils match the picture before reading the other prompts. Give time to think and allow a pass. Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

Teaching script · Starter

Use the drawing to ask: What do you notice in the drawing? What does a GIS layer do? Catch-up embedded this lesson: revisit symbols and grid references in Starter.

Catch-up embedded this lesson: revisit symbols and grid references in Starter.

Made by Matt

Teaching script · I do

Ask What does a GIS layer do? Point to card A. Think aloud: It shows one type of information on a map. The station and the local landmark help you find your position. Check: Can building outlines alone establish population density? No. You also need to know how many people live in the area.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

Teaching script · We do shared investigation

Toggle road, building and place layers on the supplied local map. Compare what becomes visible and what remains uncertain. Take a turn to suggest a match, then check the evidence. Ask for a clue. It shows one type of information on a map.

Made by Matt

Teaching script · We do decision checkpoint

Offer a private choice. Which claim can you check with the roads layer? Reveal: Where the roads run. The layer shows mapped routes. Population or causes need other evidence. Optional: show one map comparison to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help. Mark R only after the pupil has responded to feedback with an adult.

Made by Matt

Teaching script · You do

Select one route. Start in your book. Capture or print an annotated map with at least two layers. Retain the learner’s own map comparison and actual support used. Return-to-learning route for this lesson: after a pause, rejoin Supported with one reference point and the layer key.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

Teaching script · Review and improve

Check one evidence detail. The road layer shows routes. The building layer shows outlines. Ask for one improvement or reason to keep the detail.

Made by Matt

Teaching script · Exit ticket

Use the two exit questions. What does a GIS layer do? Can building outlines alone establish population density? Accept accurate equivalents and plan the next prompt. At check-out, record E for … against the pupil's target.

Explain one idea in your own words.

Check a source. Show what it says about your idea.

What helped you most today, or what would you change next time?

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

Mark scheme

Credit	What to look for
Accurate evidence	The station and the local landmark help you find your position.
Explanation	The road layer shows routes. The building layer shows outlines.
Limit or check	A layer only shows what its source records.

Made by Matt
