Local fieldwork and data collection

Humanities · LAUNCH · Autumn 2 · Week 4 · HUM-LAUNCH-A2-W04

Staff card

Staff print card

3 November 2026

Invite a response. Give thinking time. The learner may pass.

Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Code	Meaning
VF	Verbal feedback
WS	Worked with support
I	Independent
NS + …	Next step
E	Evidence captured
R	Pupil responded to feedback
//	Self-edit point
?	Read this back to me

At check-out, record E for … against the pupil's target.

Mark R only after the pupil has responded to feedback with an adult.

Return-to-learning route for this lesson: after a pause, rejoin Supported with the agreed category list and one observation.

Soft instrumental music for transitions if the class plan says so

Sound is off by default.

Pupils edit in the same colour, on the same page.

Made by Matt

P17 · SLT planning and evaluation

Conduct local area fieldwork and collect data.

Stage	Minutes
Arrival including opening	4
Starter	3
I do	6
We do shared investigation	7
We do decision checkpoint	2
You do	12
Review and improve	3
Exit ticket	3

Planned adaptations

Need	Plan
Read or sequence	Use one card and one short instruction.
Communicate	Allow a private point, sign, spoken answer or exact scribing.
Pause and return	Return-to-learning route for this lesson: after a pause, rejoin Supported with the agreed category list and one observation.
Access the drawing	Use the larger view or describe the marked features.

Catch-up embedded this lesson: revisit land-use categories with the practice tally in Starter, then agree a shared rule in We do.

If behind

Keep one model clue, one shared check, the checkpoint, a book response and the exit. Shorten repeated practice.

Staff evaluation

Evidence, adaptation and next teaching move

P18 · Individual target opportunities

Use the learner’s actual agreed target.

Opportunity	Evidence	Actual support
Find a clue	Select a card detail.	_____
Explain	Link evidence to the answer.	_____
Check	Keep or revise one detail.	_____
Regulate	Use a pause or a private response.	_____

The teacher models one step. A second adult, if available, reads a card or records the exact response. With one adult, set out the card and return for the pupil’s reason.

Give time, point to a clue, ask a short question, then offer a frame or choice. Invite a response. The learner may pass.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 4 · HUM-LAUNCH-A2-W04

First lesson back · once-only read

Check what pupils can show from the previous lesson and revisit it within the planned stage.

Use the supplied examples. Invite a response, give thinking time and allow a pass. Use only the learner’s own evidence.

Made by Matt

Teacher answers · Arrival

Arrival · Supported

Point to the picture that matches the top one.

The lower left picture matches the top one.

Arrival · Supported

Which meaning fits settlement?

A place where people live

Arrival · Supported

Why agree categories before counting?

It makes observations more consistent and comparable.

Arrival · Supported

Can fictional training data be submitted as your fieldwork?

No. Keep actual observations and practice data clearly separate.

Arrival · Independent

Point to the picture that matches the top one.

The lower left picture matches the top one.

Arrival · Independent

Which meaning fits settlement?

A place where people live

Made by Matt

Arrival · Independent

Why agree categories before counting?

It makes observations more consistent and comparable.

Arrival · Independent

Can fictional training data be submitted as your fieldwork?

No. Keep actual observations and practice data clearly separate.

Arrival · Aspire

Point to the picture that matches the top one.

The lower left picture matches the top one.

Arrival · Aspire

Use settlement in an accurate example.

A settlement is a place where people live. The smaller town in Card D is an example of a settlement.

Arrival · Aspire

Why agree categories before counting? Which detail supports your answer?

It makes observations more consistent and comparable. The practice tally in Card C keeps homes and shops in separate categories, so both can be counted in the same way.

Arrival · Aspire

Can fictional training data be submitted as your fieldwork?

No. Keep actual observations and practice data clearly separate.

Made by Matt

Starter

Which category has the highest count in the practice tally?

Homes, with 12.

Starter

What is the tally for?

It helps us practise a method before collecting actual observations.

Starter

Why agree categories before counting?

It makes observations more consistent and comparable.

Starter

Can fictional training data be submitted as your fieldwork?

Use fictional data for practice and keep it separate from your own observations.

I do · 1

Why agree categories before counting?

It makes observations more consistent and comparable.

I do · 1

Which source helps us begin?

Use card C. Card C has shops 8, homes 12, public services 4 and green spaces 6.

Made by Matt

I do · 2

Which detail in the card can help with the question?

Card C has shops 8, homes 12, public services 4 and green spaces 6.

I do · 2

What does this clue help us say?

An agreed category definition lets two people record the same land use in the same way.

I do · 3

How could I explain the link?

Agree the area and rule for mixed uses, count once per observation, and keep the raw tally.

I do · 3

How can I start my answer?

Our area is ____. Our rule is ____. I recorded ____. I checked ____.

I do · 4

Can fictional training data be submitted as your fieldwork?

No. Use fictional data for practice and keep it separate from your own observations.

I do · 4

What is one limit to keep in mind?

A small observation area cannot represent every street or land use in the wider area.

Made by Matt

We do

What do we agree before counting?

Agree a manageable area, an enquiry question and clear categories.

We do

How can we avoid double counting?

Agree the unit to count and use one tally mark for each recorded use.

We do

What do we keep for the next lesson?

Keep the raw tally, area, method, categories and each learner’s role.

We do

Which clue will you use?

Card C has shops 8, homes 12, public services 4 and green spaces 6.

We do

What is one limit?

A small observation area cannot represent every street or land use in the wider area.

We do decision checkpoint

Which choice fits the evidence?

Agree one rule and practise it.

Made by Matt

We do decision checkpoint

What evidence helps you decide?

A common rule makes each observation comparable and helps avoid double counting.

Made by Matt

You do · Supported

Check the detail you used.

Card C has shops 8, homes 12, public services 4 and green spaces 6.

You do · Supported

Check your reason or limit.

An agreed category definition lets two people record the same land use in the same way. A small observation area cannot represent every street or land use in the wider area.

You do · Independent

Check the detail you used.

Card C has shops 8, homes 12, public services 4 and green spaces 6.

You do · Independent

Check your reason or limit.

An agreed category definition lets two people record the same land use in the same way. A small observation area cannot represent every street or land use in the wider area.

You do · Aspire

Check the detail you used.

Card C has shops 8, homes 12, public services 4 and green spaces 6.

You do · Aspire

Check your reason or limit.

An agreed category definition lets two people record the same land use in the same way. A small observation area cannot represent every street or land use in the wider area.

Made by Matt

You do · Choice

Check the detail you used.

Card C has shops 8, homes 12, public services 4 and green spaces 6.

You do · Choice

Check your reason or limit.

An agreed category definition lets two people record the same land use in the same way. A small observation area cannot represent every street or land use in the wider area.

Made by Matt

Review and improve

Is my detail accurate?

Card C has shops 8, homes 12, public services 4 and green spaces 6.

Review and improve

Does my reason follow from the source?

An agreed category definition lets two people record the same land use in the same way.

Review and improve

What could I check or change?

A small observation area cannot represent every street or land use in the wider area. Edit in the same colour, on the same page.

Exit · Supported

Why agree categories before counting?

It makes observations more consistent and comparable.

Exit · Supported

Can fictional training data be submitted as your fieldwork?

No. Use fictional data for practice and keep it separate from your own observations.

Exit · Independent

Why agree categories before counting?

It makes observations more consistent and comparable.

Made by Matt

Exit · Independent

Can fictional training data be submitted as your fieldwork?

No. Use fictional data for practice and keep it separate from your own observations.

Exit · Aspire

Why agree categories before counting? Use one clue.

It makes observations more consistent and comparable. Card C has shops 8, homes 12, public services 4 and green spaces 6.

Exit · Aspire

Can fictional training data be submitted as your fieldwork?

No. Use fictional data for practice and keep it separate from your own observations. A small observation area cannot represent every street or land use in the wider area.

Exit · Choice

Point, draw, sign or tell an adult. Why agree categories before counting?

It makes observations more consistent and comparable.

Exit · Choice

Can fictional training data be submitted as your fieldwork?

No. Use fictional data for practice and keep it separate from your own observations.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 4 · HUM-LAUNCH-A2-W04

TA Brief

Conduct local area fieldwork and collect data.

Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Use the supplied examples. Invite a response, give thinking time and allow a pass. Use only the learner’s own evidence.

Return-to-learning route for this lesson: after a pause, rejoin Supported with the agreed category list and one observation.

Optional: show one observation or tally check to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help.

Use one route. Record only the pupil’s own response and the support given. Next lesson: From fieldwork to spreadsheet and graph.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 4 · HUM-LAUNCH-A2-W04

Teaching script · Arrival including opening

Use one Arrival route. Let pupils match the picture before reading the other prompts. Give time to think and allow a pass. Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Made by Matt

Teaching script · Starter

Use the drawing to ask: Which category has the highest count in the practice tally? What is the tally for? Catch-up embedded this lesson: revisit land-use categories with the practice tally in Starter, then agree a shared rule in We do.

Catch-up embedded this lesson: revisit land-use categories with the practice tally in Starter, then agree a shared rule in We do.

Made by Matt

Teaching script · I do

Ask Why agree categories before counting? Point to card C. Think aloud: It makes observations more consistent and comparable. Card C has shops 8, homes 12, public services 4 and green spaces 6. Check: Can fictional training data be submitted as your fieldwork? Use fictional data for practice and keep it separate from your own observations.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 4 · HUM-LAUNCH-A2-W04

Teaching script · We do shared investigation

Agree a manageable enquiry and a consistent land-use category system. Practise one tally before going to the agreed observation area. Take a turn to suggest a match, then check the evidence. Ask for a clue. Agree a manageable area, an enquiry question and clear categories.

Made by Matt

Teaching script · We do decision checkpoint

Offer a private choice. Two groups use different rules for the same shop. What should they do first? Reveal: Agree one rule and practise it. A common rule makes each observation comparable and helps avoid double counting. Optional: show one observation or tally check to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help. Mark R only after the pupil has responded to feedback with an adult.

Made by Matt

Teaching script · You do

Select one route. Start in your book. Collect labelled observations for a small agreed local area or accessible school site. Retain the learner’s own observation or tally check and actual support used. Return-to-learning route for this lesson: after a pause, rejoin Supported with the agreed category list and one observation.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 4 · HUM-LAUNCH-A2-W04

Teaching script · Review and improve

Check one evidence detail. An agreed category definition lets two people record the same land use in the same way. Ask for one improvement or reason to keep the detail.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 4 · HUM-LAUNCH-A2-W04

Teaching script · Exit ticket

Use the two exit questions. Why agree categories before counting? Can fictional training data be submitted as your fieldwork? Accept accurate equivalents and plan the next prompt. At check-out, record E for … against the pupil's target.

Explain one idea in your own words.

Check a source. Show what it says about your idea.

What helped you most today, or what would you change next time?

Made by Matt

Mark scheme

Credit	What to look for
Accurate evidence	Card C has shops 8, homes 12, public services 4 and green spaces 6.
Explanation	An agreed category definition lets two people record the same land use in the same way.
Limit or check	A small observation area cannot represent every street or land use in the wider area.
