Knowledge organiser

Conduct local area fieldwork and collect data.

It makes observations more consistent and comparable. Use fictional data for practice and keep it separate from your own observations.

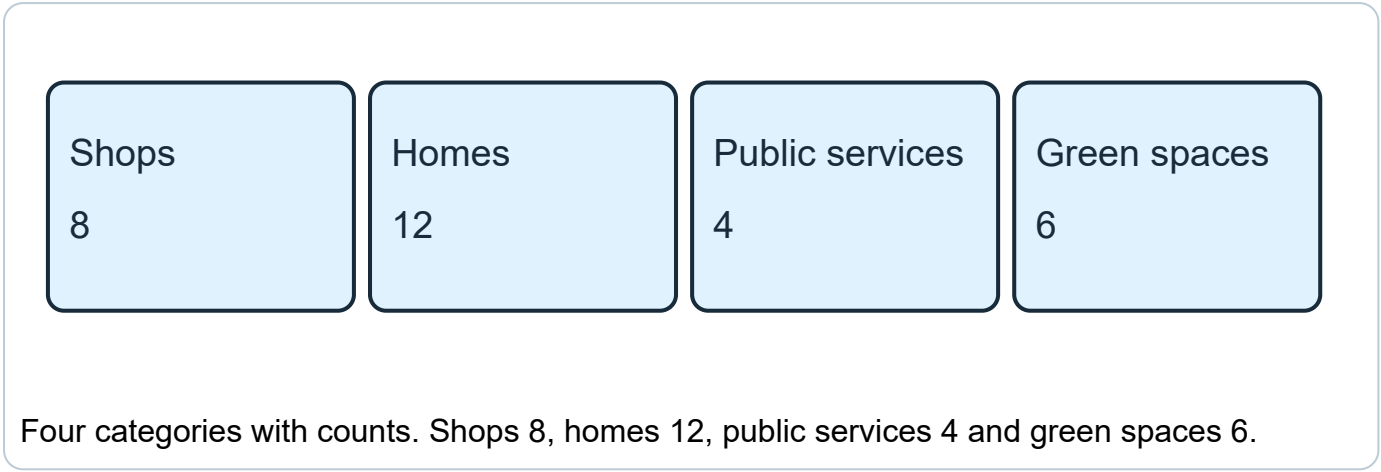

Tier	Word	Meaning
Tier 2	settlement	A place where people live
Tier 2	urbanisation	Growth in the share of people living in urban places
Tier 3	land use	What land is used for
Tier 2	GIS	Mapping information in separate data layers

Our area is ____. Our rule is ____. I recorded ____. I checked ____.

Fictional practice tally

Four categories with counts. Shops 8, homes 12, public services 4 and green spaces 6.

This drawing is fictional practice data. Retain your own raw tally and observation details for the enquiry.

Made by Matt

Evidence cards A and B

A · Local reference points

The main railway station and the local bridge are reference points on our digital map. Toggle layers to examine their positions. the civic building lies beyond this map’s southern boundary.

These points alone cannot show population density or prove why development happened.

B · Reasons places grow

Work, transport and services can attract people and businesses. A growing town may need more homes and infrastructure. Population growth can also occur within existing settlements.

A reason is a hypothesis until tested against evidence for a particular place.

Made by Matt

Evidence cards C and D

C · Practice land-use sample

Fictional practice tally: shops 8, homes 12, public services 4, green spaces 6. This is training data only. Replace it with your labelled observations for the fieldwork enquiry.

This example does not describe every person or place.

D · Contrasting reference place

Compare a small centre such as the smaller centre with the larger centre at comparable map scales. Record the area, source and date used.

One sampled street does not represent a whole settlement.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 4 · HUM-LAUNCH-A2-W04

Shared investigation

Agree a manageable enquiry and a consistent land-use category system. Practise one tally before going to the agreed observation area. Take a turn to suggest a match, then check the evidence.

1. What do we agree before counting?
2. How can we avoid double counting?
3. What do we keep for the next lesson?

Evidence or step	Check
What do we agree before counting?	Add your answer or card clue.
How can we avoid double counting?	Add your answer or card clue.
What do we keep for the next lesson?	Add your answer or card clue.

Our explanation

Optional · respond to feedback together

Optional: show one observation or tally check to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help.

My response or improvement

We do decision checkpoint

Two groups use different rules for the same shop. What should they do first?

1. Agree one rule and practise it
2. Add both counts together
3. Replace their count with the practice tally

My claim and clue

Made by Matt

Worked model

Ask the question

It makes observations more consistent and comparable. Use card C. Card C has shops 8, homes 12, public services 4 and green spaces 6.

Find the evidence

Card C has shops 8, homes 12, public services 4 and green spaces 6. An agreed category definition lets two people record the same land use in the same way.

Explain the link

Agree the area and rule for mixed uses, count once per observation, and keep the raw tally. Our area is ____. Our rule is ____. I recorded ____. I checked ____.

Check what we know

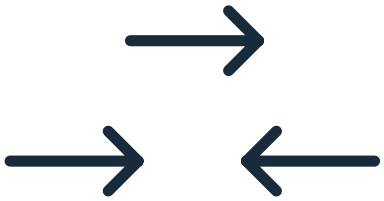

Use fictional data for practice and keep it separate from your own observations. A small observation area cannot represent every street or land use in the wider area.

Arrival · Aspire

1. Point to the picture that matches the top one.

2. Use settlement in an accurate example.

3. Why agree categories before counting? Which detail supports your answer?

4. Can fictional training data be submitted as your fieldwork?

Ready to learn?

- Amber · Help
- Red · Pause

You may point, choose or pass.

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.

Made by Matt

You do · Aspire

Staff mark I · S · C beside the task.

1. Start in your book. Collect labelled observations for a small agreed local area or accessible school site.
2. Record location, categories, method and your own role.
3. Check the tally and retain raw data for the next lesson.
4. Identify a source of sampling bias and suggest a practical improvement.

Word bank: settlement · urbanisation · land use · GIS.

My example and card detail

My reason and check

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.

Made by Matt

Edit in the same colour, on the same page.

Why agree categories before counting? Use one clue.

Can fictional training data be submitted as your fieldwork?

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.

Explain one idea in your own words.

Check a source. Show what it says about your idea.

Pupil voice

What helped you most today, or what would you change next time?
