Knowledge organiser

Record fieldwork in a spreadsheet and graph it.

It compares counts across separate categories. Use the labelled practice data to learn the skill. Collect actual observations before drawing a fieldwork conclusion.

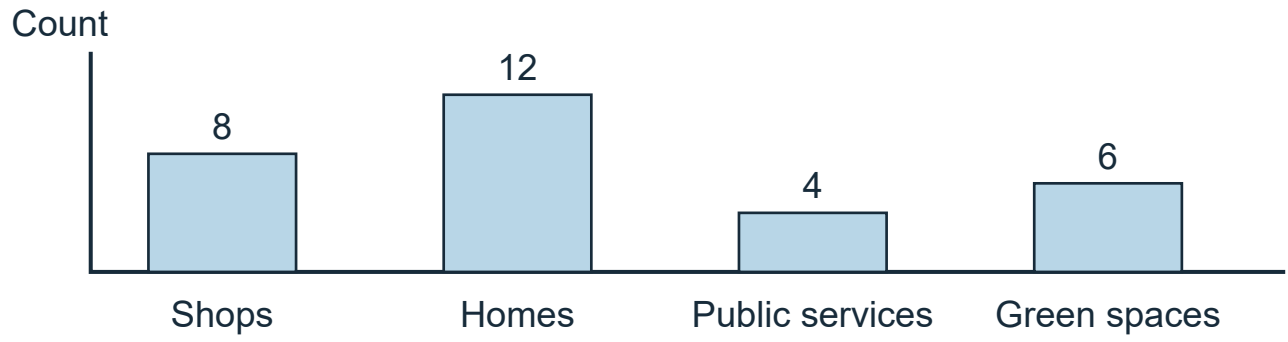

Tier	Word	Meaning
Tier 2	settlement	A place where people live
Tier 2	urbanisation	Growth in the share of people living in urban places
Tier 2	land use	What land is used for
Tier 2	GIS	Mapping information in separate data layers

The most common recorded use was ____ at ____. This sample shows ____ but cannot show ____.

Fictional land-use bar chart

A bar chart of fictional counts: shops 8, homes 12, public services 4 and green spaces 6.

This practice chart uses the reviewed fictional tally. Use your own labelled counts for the fieldwork graph.

Evidence cards A and B

A · Local reference points

The main railway station and the local bridge are reference points on our digital map. Toggle layers to examine their positions. the civic building lies beyond this map’s southern boundary.

These points alone cannot show population density or prove why development happened.

B · Reasons places grow

Work, transport and services can attract people and businesses. A growing town may need more homes and infrastructure. Population growth can also occur within existing settlements.

A reason is a hypothesis until tested against evidence for a particular place.

Made by Matt

Evidence cards C and D

C · Practice land-use sample

Fictional practice tally: shops 8, homes 12, public services 4, green spaces 6. This is training data only. Replace it with your labelled observations for the fieldwork enquiry.

This example does not describe every person or place.

D · Contrasting reference place

Compare a small centre such as the smaller centre with the larger centre at comparable map scales. Record the area, source and date used.

One sampled street does not represent a whole settlement.

Shared investigation

Transfer a practice tally into the prepared table. Choose a bar chart and check category names, values and units. Take a turn to suggest a match, then check the evidence.

1. Which column holds the names?
2. Which column holds the numbers?
3. What should you verify against the tally?

Evidence or step	Check
Which column holds the names?	Add your answer or card clue.
Which column holds the numbers?	Add your answer or card clue.
What should you verify against the tally?	Add your answer or card clue.

Our explanation

Optional · respond to feedback together

Optional: show one checked value or graph detail to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help.

My response or improvement

We do decision checkpoint

Which graph fits a tally of separate land-use categories?

1. A bar chart
2. A line showing change
3. A location map with no counts

My claim and clue

Made by Matt

Worked model

Ask the question

It compares counts across separate categories. Use card C. The practice tally records shops 8, homes 12, public services 4 and green spaces 6.

Find the evidence

The practice tally records shops 8, homes 12, public services 4 and green spaces 6. Each bar shows a count for a distinct category. Check the table against the raw tally before interpreting the bars.

Explain the link

Transfer categories and counts, label the axes and units, then read a pattern supported by the chart. The most common recorded use was ____ at ____. This sample shows ____ but cannot show ____.

Check what we know

Use the labelled practice data to learn the skill. Collect actual observations before drawing a fieldwork conclusion. A practice chart does not give evidence about a real enquiry area.

You do · Choice

Staff mark I · S · C beside the task.

1. Choose to point, speak, sign, draw or write. Keep your response in your book.
2. Create a labelled graph and verify the transfer against the raw tally.
3. Describe a pattern and one limitation of the sample.

Word bank: settlement · urbanisation · land use · GIS.

My example and card detail

My reason and check

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.

Made by Matt

Review and exit · Choice

Point, draw, sign or tell an adult. Why is a bar chart suitable for land-use categories?

What if you have no fieldwork tally?

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.
