Science · BUILD · Autumn 2 · Week 1 · SCI_BUILD_A2_W01_P1

TA Brief

Lesson goal: I can describe how to care for a place by using less, using safe items again, and sorting waste for recycling.

Weekly arc: Lesson 1 of 2 · Introduce and explore (Lesson 2 will build on this to show what pupils know).

No cold calling: Nobody is asked to read difficult text aloud without agreement. Invite a response, give thinking time, and accept a pass.

Prompt ladder: Give time to start → point to Reference A or B → rephrase → offer a two-word bank → reduce to a binary choice. Never jump straight to telling the answer.

Late arrival or absence? Use the Arrival picture cue and Reference A, never extra workload.

During You do: Mark **I** (independent), **S** (supported), or **C** (choice) beside each task in the book to show the level of independence, not effort. Report the specific barrier (reading, vocabulary, processing, regulation, writing, or science idea) to the teacher.

Stage-by-stage TA cues

Stage	Focus check	Adult move
Arrival (5 min)	Q1 picture cue: Box A holds pencils in a clean tub (Reuse)	Check picture access on Q1 before giving a science prompt
Starter (4 min)	Washing a tub for pencils is reuse, not recycle	Wait for every pupil to commit by point, voice, or book before reveal
I do (6 min)	Step model comparing reduce, reuse, and recycle	Point to Reference A columns as the teacher steps the model
We do (7 min)	Inspector + refilled water bottle claim repair	Hear the pupil's reason before clicking Check
You do (10 min)	Supported / Independent / Choice + Aspire challenge	Support only the blocked step; fade support on the next item; mark I · S · C
Review & Exit (6 min)	Self-edit // and 3 exit checks	Say back the science heard so the pupil can confirm or amend

Guidance

Staff card · Science · BUILD · Autumn 2 · Week 1 · SCI_BUILD_A2_W01_P1

Invite a response. Give thinking time. Every pupil may pass or share privately. Never use cold calling.

Return-to-learning route: Agree a quiet pause when needed, offer the regulation words beside the colour (Green · ready to start, Amber · need a small adjustment, Red · need a quiet pause), then re-enter through one low-demand visual step (pointing to one item row on Reference A or one box on the Arrival drawing) before resuming the route task.

Transitions and environment: Use soft instrumental music for transitions if the class plan says so. Ensure any sorting items on trays are washed, clean, and free from sharp edges.

Check-out evidence recording: At check-out, record E for today's lesson against each pupil's target on the evidence app.

Optional participation-loop prompt (inside You do, not a separate stage): The pupil responds to feedback with an adult, and R is marked only after the pupil has responded.

Feedback and marking codes (staff card only)

Code	Meaning and staff use
VF	Verbal feedback given at this point
WS	Worked with adult support
I	Completed independently
NS + …	Next step: one specific, actionable improvement
E	Evidence captured on the evidence app
R	Responded: loop closed only after the pupil responds and an adult engages
//	Pupil self-edit point, in the same colour on the same page
?	Read this back to me (adult checks spoken meaning with the pupil)

Keep the pupil's first attempt visible. Never require a special pen colour or box for corrections; edits happen in the same colour on the same page after **//**.

Made by Matt

P17 · SLT planning and evaluation

Lesson code: SCI_BUILD_A2_W01_P1 · **Arc:** introduce-explore (Lesson 1 of 2: Introduce and explore)

Scheme reference: BUILD Science Scheme of Work · Autumn 2 Week 1 · Reduce, reuse, recycle.

Evidence in this lesson: Completed sorting and reason tasks in the book or usual mode, with I · S · C support mark and one // review improvement. Log practical or model evidence on the evidence app with code SCI_BUILD_A2_W01_P1.

Planned adaptations

Area of need	Planned adaptation in this lesson	Where used
Cognition and learning	Two-item comparison first (pencil tub vs crushed can), then four-item table; fade prompt after first match	Arrival, We do inspector, Supported route
Communication and interaction	Point, sign, symbol/choice card, or adult exact-word scribing; adult read-back at Exit	Every stage check and Exit ticket
Social, emotional and mental health	Regulation check with words beside colour; private check-in; quiet pause and one-step return-to-learning route	Arrival, You do, Review
Sensory and physical	Static high-contrast SVG diagrams, clean dry card sort if handling packaging is aversive, 44 px controls	All slides and Reference A/B
Language access	Everyday bridge beside Tier 2/3 words (reduce = use less; reuse = use again; recycle = remake); home-language planning welcome	I do word strip, Word help, Knowledge organiser

Where catch-up is embedded

1. **Arrival Q1** uses the self-contained Box A / Box B picture cue so any pupil can start immediately regardless of prior attendance. 2. **I do** models all three routes (reduce, reuse, recycle) step by step from concrete classroom items. 3. **Reference A and B** stay on the desk throughout You do. 4. The **Catch-up sheet** is used for absence or access only, replacing a starting step rather than adding extra workload.

If behind

Retain the Starter pencil-tub check, the I do three-route model, one We do route check (tub vs can), one You do written/pointed reason, and the Exit ticket. Trim the second We do round rather than rushing Review or Exit.

Staff evaluation (complete after teaching)

Evaluation prompt	Staff record
Delivered as planned	Yes / Partly / No — note any timing or route change
Success criteria met	Record which criteria were secure across Supported, Independent, Choice, and Aspire
Adaptations used and effect	Note which planned adaptations were used and how pupils responded
Coverage impact and next step	Ready for Week 1 Lesson 2 (Show what you know) or revisit reuse vs recycle in Arrival
Evidence banked	Book strip / work sample / entry on the evidence app

Made by Matt

P18 · Individual target opportunities

Select only the target that matches the pupil's existing individual plan held by the school. Do not copy personal details into this resource.

Target domain	Observable opportunity in this lesson	Adult recording note
Cognition and learning	Distinguishes reuse (same object kept) from recycle (material remade) using Reference A	Record whether prompt was faded on the second item
Communication	Uses because to connect reduce, reuse, or recycle to a classroom action in spoken, signed, or written form	Note mode used and whether adult read-back was confirmed
Regulation	Uses the regulation check or requests an adjustment and returns to one Reference A row	Follow agreed individual regulation plan
Sensory and physical	Uses the waste route inspector or places clean route cards accurately	Separate physical access support from science cueing
Independence	Completes the chosen route task with honest I, S, or C marking	Mark actual independence per task

Adult deployment and responsive feedback

Two-adult deployment: During I do and We do, one adult leads the model while the second adult monitors access and private responses. During You do, one adult supports pupils on the Supported/Choice routes while the other circulates across Independent and Aspire, swapping roles across the week so no pupil becomes prompt-dependent on one adult.

Single-adult / cover deployment: Keep Reference A displayed on screen during You do. Set Independent learners started on Task 1, then check in with Supported/Choice learners using the two-option stems before rotating back for VF and NS + … during Review.

Responsive feedback loop: Give private VF and one specific NS + … during You do or Review. The pupil makes a **//** edit in the same colour on the same page (or explains their reasoning orally). Record **R** only after engaging with the pupil's revision.

Made by Matt

Science · BUILD · Autumn 2 · Week 1 · SCI_BUILD_A2_W01_P1

First lesson back · once-only read

1. Five-minute book scan before teaching

Scan books for five minutes to check pupils' prior materials vocabulary from Autumn 1. Identify access barriers and actual starting points.

2. Existing NS + is history

Do not spend lesson time chasing historical feedback from previous weeks. Start fresh feedback from today's reduce, reuse, and recycle work.

3. Brief check with cover staff and TAs

Confirm which route cards and clean sorting items are on the bench and whether any pupil prefers the dry card route.

4. Check the roll against evidence

If a pupil missed the start of the unit, give them Reference A and the Arrival picture cue; do not require them to complete missed sheets first.

5. One read after Exit, once

Read today's Exit ticket once against the three success criteria to set the starting route for Lesson 2 (Reduce, reuse and recycle: show what you know).

Made by Matt

Teacher answers and topic guidance

Accept any scientifically equivalent wording in spoken, signed, pointed, drawn, or written form.

Starter answer

Option A (Reuse). Washing a plastic tub and keeping pencils in it uses the same tub again without melting or remaking the plastic.

Arrival · Supported

1. Tray B shows a clean tub holding pencils.
2. Animals get food from what they eat.
3. Muscles pull on bones to help us move.
4. Yes. We can write on the blank back to use less paper.

Arrival · Independent

1. Tray A shows a paper sheet with a blank back.
2. Animals get food from what they eat, while green plants make their own food using light.
3. The skeleton holds the body up and muscles pull on bones so we can move.
4. Using the clean tub again holds pencils without needing to buy or make a new tub.

Arrival · Aspire

1. Tray A uses the blank back so we take no new paper, and Tray B reuses a clean tub so we need no new pot.
2. Animals cannot make their own food, so they must eat to get energy and materials for their bodies.
3. A muscle can contract and pull a bone across a joint, so another muscle pulls it back.
4. We must check that the tub is clean and has no sharp or broken edges.

You do · Supported mark scheme

1. The paper with a blank back matches Reduce (use less). *(Up to 2 marks)*
2. We can reuse the clean tub to hold pencils, or reuse the cloth bag to carry books. *(Up to 2 marks)*
3. I can use the tub again because it is clean and safe. *(Up to 2 marks)*

You do · Independent mark scheme

1. Reduce: sheet with blank back. Reuse: clean tub and cloth bag. Recycle: empty metal can (after checking local bin rules). *(Up to 3 marks)*
2. Using the cloth bag again is reuse. It saves new material because we do not need to make a fresh bag. *(Up to 3 marks)*
3. First check that the item is clean and has no sharp edges. Second check the local bin label to see if that material is accepted. *(Up to 2 marks)*

You do · Choice mark scheme

1. 1. Reduce (use less). 2. Reuse (use again). *(Up to 2 marks)*
2. 3. Metal. 4. Local bin label. *(Up to 2 marks)*
3. Use a clean cloth bag again because it is clean and needs no new material. *(Up to 2 marks)*

You do · Aspire challenge mark scheme

1. Reusing keeps the same clean tub and uses it again without changing it. Recycling breaks the old plastic down at a factory to make a new item. *(Up to 2 marks)*
2. Using less and reusing a safe item stop waste right away without needing lorries and factory energy to melt and remake the material. *(Up to 2 marks)*

Exit ticket · Supported

1. That is Reduce (use less).
2. Yes. That is reuse.
3. We check the local bin label.

Exit ticket · Independent

1. Reduce: write on the blank back of a sheet. Reuse: fill a clean tub with pencils or use a clean cloth bag again.
2. Material means what a thing is made of, such as metal in a can or paper in a sheet.
3. Different places accept different materials, and the wrong item can spoil the recycling load.

Exit ticket · Aspire

1. Reuse uses the same clean item again as it is, while recycle processes old material into a new product.
2. Refilling reduces the number of new bottles made and avoids the energy needed to collect and reprocess five bottles.
3. An unchecked waste item could be dirty or have sharp edges that could hurt someone.

Topic guidance and common misconceptions

- **Reuse vs recycle:** Pupils often call any positive environmental action 'recycling'. Emphasise the object test: if the bottle or tub stays the same object, it is **reuse**; if a factory melts or pulps the material to make a new thing, it is **recycle**.
- **Why reduce and reuse come first:** Recycling still uses collection trucks, heat, water, and electricity. Reducing and reusing save both raw materials and factory processing energy.
- **Clean and dry sorting:** Food or liquid left inside containers can spoil a whole load of paper or card in a recycling bin.

Made by Matt

Teacher and cover plan

Lesson: Science · BUILD · Autumn 2 · Week 1 · SCI_BUILD_A2_W01_P1 · **Title:** Use less, use again, sort waste: introduce and explore. · **Weekly arc:** Introduce and explore (Lesson 1 of 2)

Learning goal: I can describe how to care for a place by using less, using safe items again, and sorting waste for recycling.

Stage	Minutes	Pupil activity and teacher check
Today I can	2	Which box shows using less at the start, which shows using the same object again, and which shows remaking material?
Arrival	5	Use Question 1 to check picture access first. Accept pointing, speech, sign, or book responses.
Starter	4	Every pupil commits before the reveal. Check that pupils spot that the tub stays the same object.
I do	6	Think aloud through one route at a time. Pause so pupils point to whether the item stays the same object or is remade.
We do	7	Invite each pupil to predict and explain before clicking Check. Do not accept a click without a spoken, pointed, or written reason.
You do	10	One adult supports the Supported route; the other holds the group. Mark I, S, or C beside each task to show independence.
Review and improve	3	Give private verbal feedback and one clear next step. Wait for the pupil response and engage with it before closing the loop.

Stage	Minutes	Pupil activity and teacher check
Exit ticket	3	Receive each response and repeat the science back so the pupil can confirm or correct it. Use the exit to pick the starting point for Lesson 2.

Total time: 40 minutes. **Next lesson:** Use less, use again, sort waste: show what you know.

Equipment & safety: Reference A and B sheets, route cards, optional clean dry classroom items (scrap paper, washed plastic tub, cloth bag, clean smooth-edged drink can or picture card). Never use sharp tin lids, broken glass, or unwashed food packaging.
