Teacher answers.

Starter · all routes.

1. What happened when we put a drop of water on chalk?

Cue · Chalk · water drop.

Answer 1 · The water drop soaked into the chalk.

2. A roof must keep rain out. What water result do we need?

Answer 2 · We need a rock where water stays on top.

We do decision reveal.

A. Hard and keeps water out. Feet and rain will not wear it away fast.

Card answers and next steps.

Card.	Answer and next step.
A.	Fits a roof. It is hard and keeps rain out.
B.	Fits board drawing. Fails outside in rain.
C.	Fits outdoor steps. Hard and keeps water out.
D.	Fails on a wet path. Grains wear away.
E.	Fits an indoor worktop. Wipe water away.
F.	Fails outdoors. Water breaks it apart.

Made by Matt

Mark scheme.

Today I can.

- I can read a test clue.
- I can pick a rock for a job.
- I can give a reason.

Route.	Accept at Exit.
Supported.	Selects slate or granite and links it to a dry roof or strong step.
Independent.	Links slate keeping water out to roof use, and chalk soaking water to failure.
Aspire challenge: choose.	Explains that a rock may need to be both hard and water-resistant.
Choice.	Shows one valid rock-to-job match with a test clue.

Pupil voice accepted answer.

What feedback did you get, and what did you change?

“The adult asked why chalk fails. I added that water soaks in.”

What helped you most today, or what would you change next time?

Accept the pupil’s own example or a pass. Record their own words and actual support.
