Reference sheets

Reference A · Autumn science recap kits, clues, and model limits

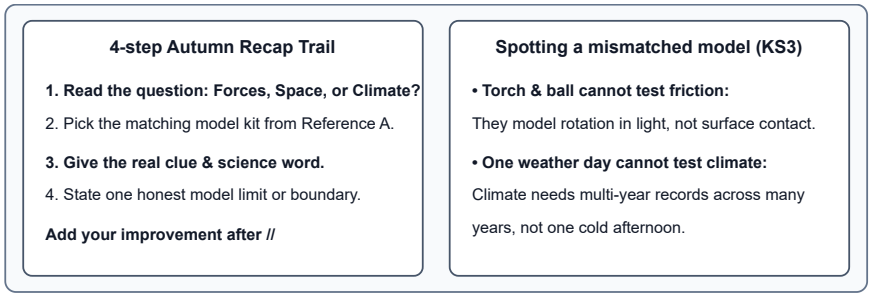

Autumn Recap Trail diagram. It links three questions to their models, clues, and limits.

Reference only. Do not write on this sheet. Match your question to one model kit below.

Science question.	Matching model kit.	Observed clue.	Key Stage 3 reason and limit.
1. Forces: What slowed the toy or sled?	Toy or sled and two marked surfaces (smooth vs rough mat).	Smooth rolled 48 cm; rough mat rolled 28 cm.	Reason: contact friction opposes motion. Limit: one small toy on two flat strips.
2. Space: Why does a place get day and night?	Torch and turning ball with a marked spot.	The marked spot turns from torch light into shade.	Reason: Earth rotates on its axis. Limit: torch and ball are not to real scale.
3. Climate: Is the climate warming over time?	Multi-year climate record cards across many years.	Long-term temperature pattern rises across decades.	Reason: climate is a multi-year pattern. Limit: one cold day is weather, not climate.
4. Honest model check.	Compare any simple classroom model with the real system.	Identify one detail the simple kit leaves out.	Reason: naming limits prevents over-claiming from a simple model.

Reference B · Four-step Recap Trail and mismatch repair

Four-step Autumn Recap Trail diagram. It shows model matching, clues, limits, and mismatch fixes.

Trail step.	What to do in your book or usual mode.	Example from today's recap.
1. Choose the model.	We used the ___ to answer why ___.	We used the sled and two marked surfaces to test stopping distance.
2. Give the clue & reason.	We observed ___ because ___.	Smooth gave 48 cm vs 28 cm on rough mat because contact friction slowed the sled.
3. State one limit.	One limit of this model is ___.	One limit is that we only tested one small sled on two flat indoor strips.

Made by Matt

Tier pack · Independent

Use Reference A and Reference B. Work in your book or on this sheet. Point, speak, sign, draw, type, write, or tell an adult. You may pass.

Arrival · 4 questions

1. Use the arrival drawing. Name the kit in Box 1 and the scientific force it tests.

Help. Check Box 1 for the kit and the force.

2. Examine Box 2 of the arrival drawing. Explain how the torch and turning ball model day and night.

Help. Link the turning ball to light and shade.

3. Examine Box 3. Why must we use multi-year climate cards instead of one cold day?

Help. Compare one weather day with a multi-year pattern.

4. State one limit of using a torch and turning ball as a space model.

Help. Think about size and distance in space.

You do tasks

1. Use Reference A. Match all three autumn questions to their model kit and observed clue. **Staff I ☐ S ☐ C ☐**

Help. Check Rows 1, 2, and 3 on Reference A.

2. Use Reference B. Explain one chosen question in full. Use contact friction, Earth's rotation, or multi-year climate. **Staff I ☐ S ☐ C ☐**

Help. Link the observed clue to the Key Stage 3 scientific reason.

3. Use Reference B. Explain why a mismatched model fails. State one limit of your chosen model and add a // upgrade. **Staff I ☐ S ☐ C ☐**

Help. Check the Mismatch and Limit rows on Reference B.

Optional participation-loop prompt. Share your chosen model and clue with an adult. Hear one feedback step. Reply below or with // in your book. (Staff: the pupil responds to feedback with an adult, and R is marked only after the pupil has responded.)

Exit ticket

1. Match each topic to its kit: (a) surface stopping, (b) day and night, (c) climate.

2. State the observed clue and scientific force for the two-surface sled test.

3. Why is one cold afternoon not evidence against long-term climate warming?

Pupil voice

What helped you today, and what would you change?

Point, speak, sign, draw, write or choose. You may pass.

Feedback and response · Independent

Feedback codes

Staff I ☐ S ☐ C ☐ · Route card feedback boxes: VF ☐ · WS ☐ · I ☐ · E ☐ · NS + … ☐ · R ☐ · // ☐ · ? ☐

Code	Meaning
VF	Verbal feedback
WS	Worked with support
I	Independent
NS + …	Next step
E	Evidence captured
R	Pupil responded to feedback
//	Self-edit point
?	Read this back to me

My response

My response: Record one response to feedback in your usual mode. You may pass.

Adult checks the response and ticks it, or writes R (Pupil responded to feedback).
