Test rock hardness and water

Today I can… ☐ show a safe mark test ☐ watch where drops go ☐ tell what I saw

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

Knowledge organiser

I am learning to test a rock in two ways.

Check the path. Drops may stay on top, go through or run round the edge. These are models, not test results. Not to scale.

Word	It means
hardness	how hard a thing is to mark
absorb	take in a liquid
water	a liquid used in our test
test	a check to find out

One test checks a mark. One test checks water.

Look at the edge as well as the tray. Say which route you saw.
