

A Town Grows Fast

I can use dated evidence to explain town growth without claiming the data tells the whole story.

[Open the original interactive lesson](#)

Arrival · retrieve the previous move

Standard

Sort each card as DRIVER or SIGN OF GROWTH.

Pupil-chosen arrival variant

Arrival rule: retrieve before adding new content. Personal or family disclosure is never required.

Starter · question before verdict

Enquiry

How did port, rail and iron help Middlesbrough grow so fast?

Retrieval question: Which is the best explanation for fast growth?

- A. Port, rail, works and work linked together
- B. The river did everything by itself
- C. The town grew for no reason

I Do · model the disciplinary move

Model the decision and evidence, not just the answer.

STEP A driver helps cause growth; an indicator shows that growth happened.

STEP Port, rail and iron work can attract workers and building.

STEP Population data shows size, not whether life was easy or fair.

I Do · model the disciplinary move

Growth detective · order, link, then ask what is missing

- A. 1861: about 19,000 people
- B. 1830: coal port opens, a few hundred people
- C. 1901: over 91,000 people
- D. 1841: about 5,500 people

Milestones: — (choose them in date order)

Link a driver to a sign of growth:

I Do · model the disciplinary move

A. iron → houses

B. people → shops

C. work → transport

Driver → sign of growth.

A. What evidence is missing?

We Do · evidence hinge

Commit before reveal: What do the rounded population endpoints establish?

- A. The settlement became much larger; other sources are needed to explain why and how people lived
- B. Every resident worked in iron
- C. Everyone had a good home

I Do 2 · connect and qualify

Model connection, limitation and honest uncertainty.

STEP Driver chain: port → rail → works and work.

STEP Growth indicators: people, homes, streets and services.

STEP Fast growth can bring opportunities and pressures; each claim needs evidence.

ADAPTED SOURCE CARD

HUM-B-W12-C01 · From small farming community to planned town

Provenance source: HUM-B-W12-S01

I Do 2 · connect and qualify

Middlesbrough Council records 25 people in the farming community in 1801. In 1828 the estate owners bought land and planned a port and grid-pattern town; the railway branch and port followed within the 1828–30 development sequence.

Can establish Supports selected population, planning and development milestones.

Cannot establish Show individual motives, feelings, housing quality or one uncontested birthday for the town.

I Do 2 · connect and qualify

Accessible route Date strip: 1801 — 25 people; 1828 — estate and plan; 1828–30 — town, port and railway development sequence; 1850 — ironstone accelerated growth.

ADAPTED OFFICIAL-SYNTHESIS CARD

HUM-B-W12-C02 · Rounded population endpoints

Provenance source: HUM-B-W12-S02

Historic England describes growth from around 25 people in 1801 to over 90,000 by the end of the nineteenth century. The words ‘around’ and ‘over’ matter, and changing boundaries mean this is not a perfect like-for-like count.

I Do 2 · connect and qualify

Can establish Establish that Middlesbrough became dramatically larger.

Cannot establish By itself explain the causes of growth or how people lived.

Accessible route Two large-number tiles: 1801 — around 25; end of nineteenth century — over 90,000.

We Do 2 · interactive humanities lab

Interactive probe: response → evidence or representation → adult receives → next question or scaffold changes.

Growth Evidence Sort

CONSTRUCTED TEACHING SOURCE — created for classroom practice. It is not an archival original.

Disciplinary focus: Cause versus indicator versus unsupported claim

Order the milestones, then classify driver, sign or claim needing more evidence.

We Do 2 · interactive humanities lab

- A. event 1801 — around 25 people
- B. event 1828–30 — port, town and railway sequence
- C. event 1850 — Eston ironstone
- D. event Late 1800s — over 90,000 people

DRIVER

- port
- rail
- ironstone

We Do 2 · interactive humanities lab

- works

SIGN

- population
- houses
- streets
- services

NEEDS MORE EVIDENCE

- everyone prospered

We Do 2 · interactive humanities lab

- all homes were crowded
- one cause explains all

We Do 2 · interactive humanities lab

Evidence classification

- A. DRIVER port
- B. DRIVER rail
- C. DRIVER ironstone
- D. DRIVER works
- E. SIGN population
- F. SIGN houses
- G. SIGN streets

We Do 2 · interactive humanities lab

H. SIGN services

I. NEEDS MORE EVIDENCE everyone prospered

J. NEEDS MORE EVIDENCE all homes were crowded

K. NEEDS MORE EVIDENCE one cause explains all

Accessible route: Before-and-after card: 1801—small farming community; later 1800s—rapidly growing planned town. Population labels retain ‘around’ and ‘over’.

Independent · build defensible evidence

Independent humanities mission

Dated growth sequence, two driver–indicator links and a stated limitation of rounded population evidence.

16 minutes. Supported, Standard and Stretch are movable routes, not pupil labels.

HUMANITIES STUDIO READY

Source / materials Teacher-prepared constructed lab cards plus the locally approved source cards named for this lesson.

Independent · build defensible evidence

Care / access Use the stated text, visual, pointing, sorting, speaking or exactly scribed route. No personal or family disclosure is required.

Evidence target Dated growth sequence, two driver–indicator links and a stated limitation of rounded population evidence.

Supported

Order four milestones and join one driver to one growth sign.

Evidence: Date strip plus one link.

____ helped the town grow because ____.

Independent · build defensible evidence

Fade the first prompt no longer needed.

Standard

Build a web with two drivers, two signs and one consequence question.

Evidence: Evidence web.

____ linked with ____, so ____.

Stretch

Rank the strongest driver, counter it with another and add a data limit.

Evidence: Judgement plus limitation.

Independent · build defensible evidence

Most important was ____ because _____. However _____. The data cannot show _____.

Exit · receive, interpret, influence

Standard

Explain one driver → growth link.

VOICE: The pupil explains one driver–growth link through the selected exit route and chooses whether TRANSPORTER or NEWPORT is modelled first in Week 13.

One BUILD Humanities close only; no signature, receipt, upload queue or second closure form.
