

Industry and Nature: The Tees Story

BUILD • Humanities • 40 minutes

I can combine industry and nature evidence to tell a balanced Tees story.

Name: _____ Date: _____

You may write, type, say, sign, point or direct a partner. An adult can read the words and record your exact response. Keep the choice and explanation your own.

We do • make a choice and give a reason

Commit before reveal: Dated official sources record seals and birds. What is the safest conclusion?

- The habitat matters, but more evidence is needed about condition and pressures
- Industry caused no harm
- Nature and industry can never be near each other

My choice and the evidence I used:

Resources and independent record

BUILD Humanities • W14 • Industry and Nature: The Tees Story

Enquiry: How can the Tees be both an industrial place and an important place for nature?

Learning objective: I can combine industry and nature evidence to tell a balanced Tees story.

Inherited: Weeks 9–13: river and estuary, rail and port, iron, growth and moving bridges.

CONSTRUCTED TEACHING SOURCE — created for classroom practice. It is not an archival original.

Independent Humanities mission

Balanced synthesis using at least two industry and two nature clues, plus a pressure, limitation or uncertainty at the selected access route.

Evidence target: Balanced synthesis using at least two industry and two nature clues, plus a pressure, limitation or uncertainty at the selected access route.

Supported

Build a two-industry plus two-nature board.

Evidence: Four-card balanced board.

Scaffold: The Tees has ____ and ____.

Standard

Use six clues and one 'but'.

Evidence: Claim–evidence chain.

Scaffold: Industry changed ____ because _____. Nature matters because _____. But _____.

Stretch

Answer the enquiry with four or more clues, a pressure and a limit.

Evidence: Reasoned verdict.

Scaffold: Overall _____. Evidence _____. However _____. We still need _____.

Source/material record

Teacher-prepared constructed lab cards plus the locally approved source cards named for this lesson.

Historian/geographer response & Influence

Pupil Humanities decision:

Evidence or representation used:

Reasoning, limitation or uncertainty:

Audience genuinely received: describe through the agreed school workflow; no signature is required here.

Influence: The named decision-maker records the chosen enquiry, states where it will appear or gives a reasoned boundary, and reports back by the agreed date. Historical validity, rights, safeguarding and assessment are not decided by vote.

Decision maker: Humanities lead or class teacher — replace with the adult's name before delivery.

Report back by: Within five school days of Week 14 — add the calendar date before delivery.

Learner source cards

ADAPTED OFFICIAL-SOURCE CARD

HUM-B-W14-C01 • Industry and protected wildlife share a landscape

Provenance source: HUM-B-W14-S02

Natural England's 2019 announcement describes industrial facilities sharing the Tees Estuary landscape with coastal habitats. The expanded SSSI protects mudflat, saltmarsh, dunes, lagoons, birds and harbour seals.

Can establish Establish the 2019 designation rationale and protected habitat/species evidence.

Cannot establish Prove that all environmental problems are solved or provide current population counts.

Accessible route Two-column card: INDUSTRY — facilities and port landscape; NATURE — mudflat, marsh, dunes, birds and harbour seals.

HUM-B-W14-C02 • A dated Teesmouth habitat description

Provenance source: HUM-B-W14-S03

Natural England's dated reserve guidance describes sand dunes, grazing marsh and intertidal mudflats, with harbour seals and migratory waterbirds, against a backdrop of heavy industry.

Can establish Establish what the official dated description recorded.

Cannot establish Guarantee a present-day sighting or establish current habitat condition.

Accessible route Numbered clues: 1 dunes; 2 marsh; 3 mudflats; 4 seals; 5 migratory birds; 6 heavy-industry backdrop.

ADAPTED OPERATOR-ACCOUNT CARD

HUM-B-W14-C03 • Recovery involved more than one action

Provenance source: HUM-B-W14-S01

The Canal & River Trust says conservation efforts began before the Tees Barrage opened in 1995 and the river had already begun to recover. Natural England also credits water-quality

investment, habitat creation/management and conservation partnerships. The barrage is not presented as the sole cause.

Can establish Support a cautious multi-action recovery account.

Cannot establish Measure ecological change independently or assign recovery to one intervention.

Accessible route Three-stage strip: damage and sewage/industrial pressure → several recovery actions and partnerships → continuing protection and care.

Access: Three habitat icons with text labels and a 'wildlife beside industry' comparison card.

Print surface requires physical classroom checking before live use.

Paper route • discuss the lesson choices

Use these choices with the matching teaching stage. Point to or number a choice, explain it, then revisit it after feedback. The original HTML keeps the live controls.

- Teesport handles container ships
- Seals rest on Seal Sands at low tide
- The barrage controls the river level for boats and wildlife
- Chemical works at Wilton
- Wading birds feed on the mudflats
- Reclaimed industrial land is now a nature reserve
- industry
- nature
- both
- Build a balanced judgement
- INDUSTRY 1825 rail
- INDUSTRY 1850 ironstone
- INDUSTRY 1911 Transporter
- INDUSTRY 1931–34 Newport
- NATURE mudflat
- NATURE dune and marsh
- NATURE harbour seals
- NATURE migratory birds
- INTERACTION industry beside habitat
- INTERACTION many recovery actions
