## Careers can change

Tuesday 5 January 2027 · P3 · 40 minutes · Year A

Careers · BUILD · up to five learners · Spring 1 Week 1 · formative

Theme: Resilience & Change. Six-week term. Week 6 assessing; source Week 5 retains its mixed evidence role.

Thread tags: SMSC S/So (M/C: none); British Values IL/MR (D/RL/T: none).

## Weekly outcome

Students understand that career journeys are not always straight and that people may change jobs or retrain.

## Exact lesson outcome

I can put a simple career story in order and identify where someone adapted to change.

Source: BUILD Careers, physical row 16 / Spring 1 row 1. Focus F16, weekly outcome E16, lesson outcome G16; sequence H16 and timing I16.

## What this lesson teaches

A career can include different jobs and learning. A change does not mean a person has failed. Use invented stories to put events in order, spot a response to change and choose one coping strategy. No claim is made that retraining always leads quickly to a new job.

## Success checks

Put the four story events in order. Identify where the person learned a new skill to adapt. Choose one useful coping step. Record the first two checks separately; the coping note adds the response required by the sequence.

## Prepare

Books, pens, up to five sets of the Support Cards, Vocabulary Mat and staff evidence record. Adult may cut the rows into reusable cards beforehand; pupils do not write on the print references. Use pointing or card letters if loose cards are unsuitable. Confirm a private help route and place for a supported pause. No internet, login or personal phone needed.

## Where this leads

This helps me see that work plans can change and that I can ask for help with a next step.

# Forty minute sequence

| Phase | Min | Teaching |
|---|---|---|
| Arrival and retrieval | 5 | Recall job and career with picture choices. |
| I Do | 8 | Pre-teach words, then model A with pictures and concrete examples. |
| We Do | 10 | Sort B together, discuss the change, check learning and choose a coping step. |
| You Do | 12 | Sequence C through whole-set or step-by-step choices; identify adaptation and one coping strategy. |
| Review and exit | 5 | Private feedback, one next step and reply; add actual evidence to Careers Portfolio. |

5 + 8 + 10 + 12 + 5 = 40 minutes, following I16. Processing time and brief pauses are included. Give one instruction at a time. Slides 7 and 8 are alternatives in the same 23–35-minute block.

## Arrival and I Do

0–5: choose the picture of packing boxes or tending plants, then recall job as work someone does. If previous learning is missing, supply the definition. 5–9: pre-teach job, career, change and learn again using the pictures and short definitions. 9–13: model A in J K L M order. Point to K as the change and L as adapting through new learning. Model one coping step: ask for help. Read the exact outcome, then explain it simply.

## We Do

13–19: use B in the printed mixed order P Q R S. Offer two cards for what comes first, then build R P S Q. Ask privately what changed and what the person learned. Read the captions; pictures support meaning but do not prove the order. 19–23: hinge and short scenario discussion. A changed work time is not failure. Each learner chooses or states one useful coping step; no personal example is needed.

## You Do

23–35: offer C as a whole set or two cards at a time. For supported choices use V/U for first, then T/W for next, then W/U. Keep A as the model without giving C’s answer. Learners point, place or record letters in a book, type or use an aid/scribe. Identify adaptation and give one coping strategy. Log all supplied choices and prompts.

## Review and exit

35–38: check sequence and adaptation privately, set one NS and retain the reply. 38–40: each learner gives a coping step or corrects “changing jobs means failure”. Add actual sequence/resilience note to Careers Portfolio. No public retelling or family employment discussion.

# Access and checks

## Supported

Use the pictures, short captions, word bank and A model. Offer two cards at a time or fix the first card. Read, point, sign, type or use an exact scribe. Log any supplied order or answer.

## Independent

Use all four C cards with the picture and word bank. Put them in order, identify the learning card and choose one coping step. Usual reading, typing and communication aids remain available.

## Aspire

Explain how the new learning helped the person move to a new job. Suggest another useful coping step. More writing or public sharing is not required.

## Model check and fade

After A, privately ask which card shows learning: K or L. Key L. If unsure, read the captions and model change versus response again. Keep pictures, word bank and the full A example. Fade answer cues when secure; do not remove communication or reading access.

## Hinge and parallel check

Main B: which card shows adapting? A the shift times change (P); B they learn to pack boxes (S). Key B. If unclear, point to learn in A and B, then use the parallel check. Parallel A: A learning a new skill can help with change; B a new job means failure. Key A. A pass is unobserved. Recheck privately before the individual task.

## Adaptations and prompt ladder

Cognition and Learning: short captions, four-card sequence, two-choice route and visible model. Communication and Interaction: one instruction, processing time, word bank, sentence frames and usual aid. SEMH: calm predictable stages, pass, supported pause and return; no public questioning. Sensory and Physical: large pictures/text, no colour-only codes, pointing instead of moving cards. EAL: pre-teach words and plan in any language.

Prompt ladder: 1 point to place/instruction; 2 ask a short question; 3 rephrase; 4 provide scaffold/choice; 5 model the first step only, then return the task. In input, point to job and learning pictures; in guided work, prompt an event clue; in individual work, log actual help without supplying the sequence.

## Private help route

Ask a trusted adult or use the school’s help route. Point to HELP, write a request or ask for a private talk. Pass, pause and a supported return are available. If one adult is busy, seek another through the route. Do not ask for personal job-loss stories or family finances.

# Evidence and staff guidance

## Typed and scribed routes

Either task route can use Evidence Sheet page 2, Type instead, with blank sequence fields. Use the usual save routine, lesson code and work reference; share privately. A scribe captures exact words/selections, reads back quietly and allows correction. Record usual access separately from an adult-supplied answer.

## Evidence and judgement

Exact source evidence: Career-story sequence / resilience note. Keep the actual C order, change card, adaptation card or explanation, one coping strategy, access, answer prompts, first response, NS and reply. Secure sequencing is V T W U; secure adaptation identifies W/new learning in response to T/job ending. Log each separately. Partial evidence is retained; a pass is unobserved. A supported sequence is not recorded as independently ordered. Do not infer personal resilience or future employment success.

## Misconceptions and feedback

A job is one role; a career can include several roles and learning. Change is not failure. A job ending is the change; learning a new skill is one response. Learning again is possible but does not guarantee a job. Pictures show types of work, not portraits that must look identical across the story.

Give one NS such as move the change before the learning, or point to the new skill. VF verbal feedback; WS worked with support; I independent; // self-edit; ? read back; E actual banked evidence. R only after Voice, Audience, NS and response in the same colour, on the same page or usual mode. Offer to the Communication portfolio. Staff confirm any accredited mapping.

## Invented examples and safe scope

All people, jobs, event sequences and quoted history are invented. Pictures are generic work/support symbols, not real people or places and not a visual record of one person. No real employer, provider, product or platform is named. No claims about entry rules, wages or guaranteed routes. The lesson needs no live research. If a concern arises, listen calmly, avoid probing or secrecy promises and follow usual procedures; keep concerns outside shared work.

## Source and sequence

Owner corrects Tuesday P3 to BUILD Careers for Spring 1. Accepted GROW packs remain unchanged for the separate GROW line; no further GROW Careers is authorised. Next: BUILD Careers Weeks 2–6, then LAUNCH Careers Spring 1 Week 1, Friday 8 January P1. Only this Week 1 pack is authored. Pause for Downloaded.
