Assessment protocol

My work and next step

Friday 18 December 2026 · Year A · Identity & Belonging · 40 minutes

The scheme objective is to add evidence to the independence portfolio. Assess selection, explanation and storage through actual earlier work. A portfolio label or retrospective account alone does not establish an earlier practical skill. No new practical skill is taught or tested in this lesson.

Before the review

Before teaching, gather each learner's available work and dated observations from Weeks 1–6. Check ownership, original dates and storage references. Start the six-week audit without pre-judging the learner's review. Provide the usual aid, folder, evidence sheet and support cards. Keep peer records private. Plan short individual review turns during slides 6–8; learners waiting can look through their own work. If there is no earlier work, prepare a gap record rather than a model answer or replacement practical task.

Initial record and support

Read the same prompts without suggesting an explanation. Record the learner's own words, pointing or aid response before feedback. Reading and exact scribing are access help. A supplied claim, model, corrected explanation or reduced choice is content support. Record the type and timing. Separate help on the earlier task from help with today's review and filing.

Review check	What supports the judgement
Selection	An available piece or dated observation belongs to the learner and links to a taught week. Record its code, original date and location. A supported choice remains valid when the help is clear.
Explanation	The learner identifies an action or contribution and points to a relevant clue. Their account agrees with the earlier record, including adult help. Record uncertainty instead of filling a gap.
Adding evidence	The actual work is filed or a usable reference points to its storage location. Preserve the original date. Existing filed work can be cross-referenced without counting it as a new achievement.
Next step	After feedback, the learner gives or chooses a response and one familiar skill or gap to revisit. Record needed help and a review date. Keep this later response separate.

No fixed answer key

Answers depend on actual work. Do not supply fictional completed evidence. A blank sheet, adult model, peer product or checklist tick without a work reference is insufficient. A shared product requires a dated record of the learner's own contribution.

Half term evidence audit

Learner code _____ Review date _____ Staff role _____

Audit all six weeks using earlier work and observations. Use available, partial, missing or not observed. Record original dates and support. The audit is an index, not proof of every skill.

Week and focus	Work code, original date, help and status
1 · Snack plan and reason for the choice	_____ _____
2 · Observed washing and cleaning steps	_____ _____
3 · Observed recipe steps and help	_____ _____
4 · Job matches and an action clue	_____ _____
5 · Work tray, check and report	_____ _____
6 · Winter card, making steps and check	_____ _____

Strongest claim supported by the work; its reference

_____

Gap, retrieval action or planned dated check

_____

If work is missing

Retain the gap and record what is missing. Seek an existing dated observation or work reference. If none exists, arrange a separate familiar-skill check later and date it honestly. Today's help request or portfolio discussion is evidence only of what occurred today; it does not replace a missing recipe, cleaning or making observation.

Boundaries

Use only each learner's own existing work and records. No food preparation, cleaning chemicals, sharp tools or new practical task is introduced. Staff manage confidential records and final storage. A learner can point, speak, draw, write, use an aid or pause. Do not invite private family details. Missing or unobserved evidence remains a gap. A recollection is recorded as a recollection until supported by a work sample or dated observation.

Individual assessment review

Learner code _____ Review date _____ Staff role _____

For each initial review check use: shown without an extra content cue; shown with content support; not yet shown; or not observed. Record access help separately. No total score, attainment level or qualification result is inferred.

Initial review check	Judgement and work reference
Selects relevant earlier work	_____
Explains own action and the help used	_____
Links the claim to the actual record	_____
Adds work or a usable storage reference	_____

Access help today

_____

Content cue, adult action and when it occurred

_____

Unobserved or uncertain parts

_____

After feedback

Record	Actual prompt, reply or plan
Specific feedback point	_____
Later reply and support	_____
Next step and help	_____
Review date and storage reference	_____

A later supported explanation does not replace the first record. Keep both. If time prevents an individual review, record not observed and plan a dated turn. Do not infer performance from attendance, a neat product or a group answer.

Use VF · WS · I · NS+ · // self-edit · ? read back · R responded · E evidence. R requires Voice, Audience, a specific NS+ prompt and the learner response in the same colour, on the same page or usual mode. E is used only when actual work is banked. Keep the first record unchanged and the later response separate.

This helps me show what I can do and plan my next step.
