Why is a guess not enough?

Here are two answers about the same picture. Answer A: “It is old.” Answer B: “It is old, because the cars are square and the shop sign is painted.”

Try it in your head: think of a phone from a long time ago. Now think of a phone today. What is different? That difference is a clue. It tells you which is older.

We Do 1: Put three pictures in order together

Picture 1: a bus with a round front and lit-up shop signs.

Picture 2: a horse and cart outside the shop.

Picture 3: square cars and a red phone box.

We Do 2: Rank the clues together

We rank the clues on the board first. Nobody writes yet. Everyone puts their best clue on a whiteboard. Then we show them all at once. Then we agree the order of clues, strongest first. The picture for this is the one with the bus. The guess is done: now. Your job is the first box: which clue tells you most? Write one clue, not a describing word.

Then and Now

SoW: 'BUILD Weekly - Autumn'!C49 — "Sort 'then and now' photographs."

Learning objective: I can put 'then and now' pictures in order and say the clue that told me which is older.

No personal or family photographs are needed. Every task can be completed with the supplied picture set of a made-up street.

The clue chain

Clue → then or now → check. The check is a second clue.

The first row is done for you, from the chain we built together. It is in italics so you know it is not yours. Fill in as many of the rows below it as you can.

Independent Work – Standard

Exit Ticket – Standard

1) Read one chain to a partner or to an adult. The listener says back the clue they heard, in their own words.

2) Did the listener hear a different clue? Then change one word in your chain. Make it say what you meant. That change is your influence. It belongs to you, not to them.

3) Did the listener hear just what you meant? Write that down too. A chain that already works is worth noting. It needed no change.
