

Knowledge Organiser (BUILD W6): Our class map

Humanities Aut 1 · 2026–27 · Workbook outcome: Contribute to a class community map.

Key Word	Definition
Watch me do it:	Watch me do it: I take a blank label. I look at the box by the corner. I ask myself: what happens inside? People buy bread there. So I write shop. Then I stick it on.
Now watch a harder one:	Now watch a harder one: the long low box by the road. What happens inside? Buses stop there and people wait. I could write bus stop. I could write waiting place. I pick bus stop, because it says what it is for.
label	The picture has two boxes. The first is the label. The second is the note. The arrow shows the order.
note	The picture has two boxes. The first is the label. The second is the note. The arrow shows the order.
Building one together:	Building one together: the label is park. Who does it help? People who want to run about, and people who want to sit. Both go in the note.

Key Facts

- Two weeks ago we named places in our community. Today we put them on one map.
- A map is a picture of a place from above, as a bird would see it.
- A label tells you what a thing on the map is.
- A map with no labels is hard to read. You cannot tell one grey box from another.
- Every label needs to be small enough to fit and clear enough to read.
- Two people can label the same box in different words. Both can be right.

Arrival Task

What we know about places near school

1) Two weeks ago we named places in our community. Today we put them on one map.

2) A map is a picture of a place from above, as a bird would see it.

3) A label tells you what a thing on the map is.

4) A map with no labels is hard to read. You cannot tell one grey box from another.

5) Every label needs to be small enough to fit and clear enough to read.

6) Two people can label the same box in different words. Both can be right.

A map that nobody can read

Here are two maps of the same street. Map A: six grey boxes and a road. No words at all. Map B: the same six boxes. One says shop. One says clinic. One says library.

Try it in your head: you are new here. You need a chemist. Which map helps you, A or B? Now you know why we label.

We Do 1: Add your label to the class map

Box 1: the small box near the crossing. What happens inside?

Box 2: the long box beside the park. What happens inside?

Box 3: the round building on the corner. What happens inside?

We Do 2: Annotate the map together

We annotate one box together first. Nobody writes on the map yet. Everyone writes a note on a whiteboard, then we hold up the boards at the same time. The box for this one is the shop. Your job is the note: who does it help? Write about people, not about the building.

Scaffolding – Supported

Word Bank

Watch me do it:, Now watch a harder one:, label, note, Building one together:, Space, Voice, Audience, Influence

Your route

One label. Draw or stick your box, then label it. An adult may scribe what the place is for, and the words stay yours.

Sentence frames

"Who ... what they do ... so that ..." | "... because ..."

Reference Zone — keep this beside your work

The model

Watch me do it: I take a blank label. I look at the box by the corner. I ask myself: what happens inside? People buy bread there. So I write shop. Then I stick it on.

Now watch a harder one: the long low box by the road. What happens inside? Buses stop there and people wait. I could write bus stop. I could write waiting place. I pick bus stop, because it says what it is for.

Building one together: the label is park. Who does it help? People who want to run about, and people who want to sit. Both go in the note.

Check yourself

- Check yourself: does your label say what happens inside, not the colour?
- Check yourself: could a person new to this street find the place from your label?
- Check yourself: is your note about people?
- Check yourself: did you keep your label short enough to fit on the map?

From the lesson sheet

Our class map

SoW: 'BUILD Weekly - Autumn'!C51 — "Contribute to a class community map."

Learning objective: I can add a label to our class map that says what a place is for, and add a note saying who it helps.

No home address is used. The map covers the streets around school and stops at the corner.

My part of the class map

Box → label → note. The label says what. The note says who.

The first row is done for you, from the box we labelled together. It is in italics so you know it is not yours. Fill in as many rows below it as you can.

Independent Work – Supported

One box labelled, with a scribed reason.

One label. Draw or stick your box, then label it. An adult may scribe what the place is for, and the words stay yours.

Which box	My label	Who it helps
<i>the box by the corner</i>	<i>library</i>	<i>people who want to read</i>

Choose a route

- 1. I chose my own route.
- 2. My labels are in my own words.
- 3. Any adult help is written on the record.

5 · Learner confirmation

I confirm this is my own work.

Learner name (print)	Signature
Date	

Exit Ticket – Supported

1) Read one label and note to a partner or an adult. The listener says back where they would go and why.

2) Did the listener go to the wrong box? Then change one word in your label. That change is your influence. It belongs to you, not to them.

3) Did the listener find it straight away? Write that down too. A label that already works is worth noting.

Lundy Loop — this lesson

SPACE stays available. VOICE is received. AUDIENCE names back exactly. INFLUENCE changes one real next action.

Space	means you get room to join in.
Voice	means you get to say it.
Audience	means someone really listens.
Influence	means something changes because of what you said.
