Stem-cell decisions

Today I can… I can name a possible benefit and risk. I can ask for evidence that tests a claim. I can justify further research without claiming a cure.

Teacher and cover plan

1. Outcome

I am learning to weigh a possible benefit and risk of stem-cell research using evidence.

Weekly line C41: Stem-cell ethics discussion (links RE/PSHE).

2. Arrival

Notice one detail on the fictional proposal card.

3. Starter

Hear both attempts at the three retrieval questions; confirm taught coverage.

4. I do

Model benefit, risk and an evidence request. “Might help” is not proof a treatment works.

5. We do

Complete the missing risk and match four source statements. Presenter/questioner switch roles.

6. You do

Fictional safety results are missing. Decide what to test next. Each learner keeps an individual response.

7. Routes

Supported, Independent, Aspire and Go deeper preserve source F/M/H tasks. Choose ONE route within Independent 8.

8. Access

No cold calling or personal disclosure. Pass, exact scribe and valid alternative modes. Home-language planning.

9. TA role

Use held five-step ladder. Record prompts separately. Actual adult roles agreed for the pair.

10. Exit

Hear both reasons privately. Use each response to choose the next model or prompt.

11. Evaluation

Teacher and cover plan · timing and evidence

12. Kit safety evidence and timing

Optional prepared model: large fictional benefit/risk/evidence cards and desk mat. Sort under three headings. No core practical or real medical decision is claimed.

Risk: loose cards could fall. Keep cards on the desk mat and pick up any that fall. Confirm school risk assessment and exact kit.

Evidence: each learner's own qualified reason, risk and evidence request, review edit and exit. Use SCI-LAUNCH-A2-W03. Adult prompt level stays separate.

Time	Stage
0–5 min	Arrival
5–8 min	Starter
8–13 min	I do
13–20 min	We do · KEEP
20–25 min	We do 2 · KEEP
25–33 min	Independent ONE route · KEEP
33–37 min	Review and improve
37–40 min	Exit · KEEP

Total 40 minutes. One-minute resets are inside We do, Independent and Review. Presenter/questioner roles switch, with an individual response from each learner.

Proceed when BOTH show benefit and risk evidence are needed. Re-model an unsure learner's step and ask the parallel hinge. The other learner continues independently.

If behind, keep core reasoning and individual evidence. Shorten repeated rehearsal only after secure checks. Record any change, reason and coverage impact; pass unresolved errors to Week 4's start.
