Arrival · Supported

Respond to the command word.

Select a value or mechanism that supports the answer.

Improve a claim by adding an appropriate limitation.

Four checks. Point, speak, sign, draw, write or direct an adult. An adult may read or scribe your exact words. Choose one route; do not complete all three.

1. Describe

What does “describe” ask you to do?

Help: Read or point first. State the pattern or what happens.

2. Explain

What must an explanation add?

Help: Read or point first. A scientific reason or link.

3. Calculate

What should accompany a calculated answer?

Help: Read or point first. Working and any appropriate units.

4. Evaluate

What should an evaluation consider?

Help: Read or point first. Evidence and limitations, not just an opinion.

My response: _____

Respond to the command word.

Select a value or mechanism that supports the answer.

Improve a claim by adding an appropriate limitation.

Point, speak, sign, draw, write or direct an adult. An adult may read or scribe your exact words. Choose one route; do not complete all three.

1. Explain

Improve the mitosis answer in two linked sentences.

Help: Use two linked sentences: DNA is copied during ___. The copies then ___ so each new nucleus ___.

2. Calculate

Show the working for 7/20 as a percentage.

Help: Write the fraction 7/20. Divide 7 by 20, then multiply by 100. Show the intermediate decimal.

3. Evaluate

Replace the safety claim with a qualified conclusion and a relevant improvement.

Help: Use: the study suggests ___, but does not establish ___. A useful improvement would be ___ because ___.

My response: _____

Use one route within the stated stage time. Keep your own original response.

Exit · Supported

Respond to the command word.

Select a value or mechanism that supports the answer.

Improve a claim by adding an appropriate limitation.

1. Improve

Improve “the cells grew” using a supplied change from 2.0 to 2.8 mm.

Help: Use: my answer is ___ because ___. Point to a model or card first. Use a value and unit; do not invent a cause.

2. Explain

Why is “because it does” not a useful explanation of identical daughter nuclei?

Help: Use: my answer is ___ because ___. Point to a model or card first. Add copying and separation.

My response: _____

Three practice answers

Respond to the command word.

Select a value or mechanism that supports the answer.

Improve a claim by adding an appropriate limitation.

These are practice items, not the final test. Keep each first answer. Add a science link or a useful value, and qualify a claim that is too strong.

Prompt	Weak answer
Explain mitosis outcome	The cells match because they match
Calculate 7/20 as percent	It is about a third
Evaluate a short study	It proves the treatment is safe forever

My evidence and reasoning: _____

One limit or useful check: _____

My improvement and next check

Respond to the command word.

Select a value or mechanism that supports the answer.

Improve a claim by adding an appropriate limitation.

First answer: _____

The value or model detail I used: _____

My science link: _____

My fair limit: _____

Keep your first answer. Hear the actual feedback. Make one real change, or give a reason to keep it. Record the next step you chose.

My next response: _____
