# Arrival · Supported

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

Four checks. Point, speak, sign, draw, write or direct an adult. An adult may read or scribe your exact words. Choose one route; do not complete all three.

**1. Readiness**

Which response mode will let you show your own science?

Help: Read or point first. Point, say, sign, draw, write or exact-word scribing.

**2. Materials**

Which items does the teacher permit for this checkpoint?

Help: Read or point first. Check the agreed conditions before starting.

**3. Help**

How can you ask for a word to be read without asking for a science answer?

Help: Read or point first. Ask for the wording to be read or repeated.

**4. Pacing**

What can you do if one question blocks you?

Help: Read or point first. Move on, then return; ask for a pause.

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

Point, speak, sign, draw, write or direct an adult. An adult may read or scribe your exact words. Choose one route; do not complete all three.

**1. Show**

Complete the separate 24-mark checkpoint under the agreed conditions.

Help: Read one item at a time. Use only the access help agreed for the separate checkpoint.

**2. Review**

After the test is collected, choose one answer to discuss.

Help: Keep the original response. Point to one part you understand differently after the teacher has collected the test.

**3. Plan**

Choose a next learning point after feedback.

Help: Use: my next useful step is to explain or practise ___. Choose one item, not a grade.

My response: _____

Use one route within the stated stage time. Keep your own original response.

## Starter

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

Which approach keeps the checkpoint evidence honest?

A. Let an adult replace a science answer

B. Keep the pupil’s own answer and record any content support separately

C. Use the teacher key while calling the test independent

Keep your first choice. Give a reason before the answer is checked.

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

# Agreed response conditions

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

Agree how you will respond and which materials you may use. The adult can read the words or scribe exactly what you say. The science answer stays yours.

Keep science models, the organiser and staff answers closed during the test. Ask for an agreed pause if needed.

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

# We do · sort the cards

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

| Card | Your group |
|---|---|
| Read the question exactly | _____ |
| Allow a quiet pause | _____ |
| Scribe the pupil’s exact words | _____ |
| Tell the pupil which allele is dominant | _____ |
| Show the answer key during the test | _____ |
| Complete the Punnett square for the pupil | _____ |

Groups: Access support / Content coaching — record separately.

Discuss the support rules now. During the test, each learner works alone.

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

# I do 2 · one example

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

How to answer a question without receiving content coaching.

Read or hear the question exactly.

Choose your permitted response mode.

Ask for wording to be repeated or for an agreed pause.

Keep the science answer your own; support is recorded separately.

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

# Checkpoint materials and timing

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

The teacher issues the answer-free paper. Work on it for 24 minutes. Show your own answers using the agreed mode and materials.

| Part | Marks |
|---|---|
| Cell cycle and growth | 8 |
| Stem-cell evidence | 4 |
| DNA and inheritance | 10 |
| Source judgement | 2 |
| Total | 24 |

Close the teaching display during the test. Collect both original responses before any answers or feedback are shown.

# Checkpoint · instructions

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

24 minutes. 24 marks. Use only the mode and materials agreed with your teacher. Work on your own. You can ask for the words to be read or repeated.

If one item blocks you, move on and return later. Show your working. Keep your first answer. Ask for an agreed pause when needed.

The adult collects both papers before any review. This paper has no answer key or automatic score.

# Checkpoint · questions 5 and 6

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

### 5. 4 marks

In a simulated stem-cell study, 9 of 15 treatment participants improve, compared with 3 of 15 in a comparison group. Follow-up lasts six weeks. Calculate both improvement percentages, compare them and state one limitation.

My response: _____

_____

### 6. 3 marks

Complete the statements: A chromosome contains a long molecule of ____. A gene is a ____ of that molecule. The genome means ____.

My response: _____

_____

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

# Checkpoint · questions 7 and 8

Show your own understanding under agreed conditions.

Keep original evidence distinct from later correction.

Choose a precise next learning step after feedback.

### 7. 2 marks

Give the complementary base sequence to A T C G. Name the two-stranded shape of DNA.

My response: _____

_____

### 8. 3 marks

In a simple model, A is dominant and a is recessive. Complete Aa × aa using the blank Punnett square. State the chance of an aa offspring.

| **Parent 2 / Parent 1** | _____ | _____ |
|---|---|---|
| _____ | _____ | _____ |
| _____ | _____ | _____ |

My response: _____
