

Look closely at rocks

I am learning to look at rocks and sort them.

Words

Word	It means	Example	My language
rock	a solid thing from the ground	I hold a safe rock.	
grain	a small bit in a rock	I see tiny grains.	
property	a thing you can check	This rock feels rough.	
group	things put together by a rule	These rocks are smooth.	

Look at the model

Look at grains with a hand lens. Compare with a smoother sample. Simplified; not to scale.

How I know

I can look and feel.

I can sort two rocks.

I can tell my sort rule.

Say first: I put these in one group as they are ____.

You can plan in any language.
