Forces, space and climate questions

I am learning to... choose a model that fits a science question and use a matching clue.

Words

Word	It means	Example	My language
force	a push or pull on an object	Friction is a force that can slow a toy.	
rotation	a turn around an axis	Earth’s rotation brings day and night.	
evidence	an observation or result that supports a claim	The shorter run is evidence for my answer.	
climate	weather patterns over many years	A hot day alone does not show a climate trend.	

Look at the model

Choose a model: toy and surface, torch and ball, or long climate record. Sketches are simplified; the climate line is not data.

How I know

- I can match a question to a model.
- I can give a claim with a matching clue.
- I can say one thing the model cannot show.
- Say first: My claim is ____; the clue is ____.
- You can plan in any language.
