

Investigating a science question

Today I can... ☐ I can name what I change and what I keep the same. ☐ I can record what happened in a small test. ☐ I can explain one way to make the test more dependable.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R _____

Arrival

Choose the question card: does surface change how far this toy goes? Point to what we will change.

My response

Starter

Think back. Say, point or write one answer for each question.

1. What should match a science claim?

2. Name an effect of added greenhouse gases.

3. What do we keep the same in a fair test?

Talk-then-sort

The plan has a fixed toy and start line. Add the missing launch control. Name the surface to change.

Change ____ → keep toy and ____ the same → measure distance.

Choices: change · keep same · measure

Card or step	My group or match
Surface type	
Toy	
Start line	
Travel distance	

Test two runs per surface or observe. Record distance. Name what changed, stayed the same and could limit the test.

Independent F

Point to the factor that changes.

I change the ____; I keep ____ the same.

My response

Independent M

Name two controls and record a result.

I changed ____ and kept ____ the same. My result was ____.

My response

Investigating a science question

Today I can... ☐ I can name what I change and what I keep the same. ☐ I can record what happened in a small test. ☐ I can explain one way to make the test more dependable.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R _____

Independent H

Explain why repeat runs help and identify a method limit.

My result suggests ____, but I would repeat ____ because ____.

My response

Go deeper

Two runs differ. Name a reason and fix a method step.

My response

Two repeats differ. Name a safe conclusion, then improve the method for the next test.

My response

Exit

Name the change, one control, one result and a next step.

My exit response

? Read it back: plan a fair investigation, record a result and explain a limit.

My feedback was... say what changed. Next I need to... name a fix.

Word help

Word	Meaning	Example	My language
variable	a factor that can change in a test	The surface is our changed variable.	
fair test	a test that changes one key factor and keeps other key factors the same	We use the same toy in both runs for a fair test.	
result	what you observe or measure in a test	Our result is the distance the toy travelled.	
repeat	do the test again under the same conditions	We repeat each run to check our result.
