Autumn science review and evidence

I am learning to... use a model and a matching clue to show what you know in science.

Words

Word	It means	Example	My language
evidence	a result or observation that supports a claim	A measured distance is evidence about a toy run.	
force	a push or pull on an object	Friction is a contact force.	
rotation	a turn around an axis	Earth's rotation makes day and night.	
climate	weather patterns over many years	Climate is not the weather on one day.	

Look at the model

Three ideas: toy on two surfaces, day and night, and a long climate pattern. Sketches are simplified; the line is not data.

How I know

I can choose a model that fits my question.

I can give a clue that supports my answer.

I can name one next step after feedback.

Say first: My answer is ____; I saw ____ in the model.

You can plan in any language.
