

## Autumn science review and evidence

Today I can... ☐ I can choose a model that fits my question. ☐ I can give a clue that supports my answer. ☐ I can name one next step after feedback.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R \_\_\_\_\_

### Arrival

Choose a model used this term. Point to one question it could help answer.

### My response

### Starter

Think back. Say, point or write one answer for each question.

1. What changed in last week's fair test?

2. What model can help with a toy motion question?

3. Name one force you learned in Autumn 1.

## Autumn science review and evidence

Today I can... ☐ I can choose a model that fits my question. ☐ I can give a clue that supports my answer. ☐ I can name one next step after feedback.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R \_\_\_\_\_

### Talk-then-sort

In practice, the question and torch-and-ball model are supplied. Complete the missing clue: what happens to the marked place as the ball turns?

Question: what slowed the toy? → choose toy and surface → observe \_\_\_\_ → explain a possible force; check with repeat runs.

Choices: toy and surface · torch and ball · long-term cards

| Card or step                 | My group or match |
|------------------------------|-------------------|
| Question about friction      |                   |
| Question about day and night |                   |
| Question about climate       |                   |

Choose two science questions from forces, space or climate. Show an answer with a model and a matching clue. Use only your agreed support if this is formal evidence.

### Independent F

Match one question to its model.

For \_\_\_\_, I choose \_\_\_\_.

**My response**

|             |
|-------------|
| <div></div> |
|-------------|

### Independent M

Use a model and matching clue to explain a science idea.

My answer is \_\_\_\_; I saw \_\_\_\_ in the model.

**My response**

|             |
|-------------|
| <div></div> |
|-------------|

## Autumn science review and evidence

Today I can... ☐ I can choose a model that fits my question. ☐ I can give a clue that supports my answer. ☐ I can name one next step after feedback.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R \_\_\_\_\_

### Independent H

State one limit of a model and suggest a further check.

The model suggests \_\_\_\_, but I would check \_\_\_\_ because \_\_\_\_.

**My response**

---

---

### Go deeper

For one claim, give two checks and one model limit. Say which extra observation you would seek.

**My response**

---

---

Compare two model limits. Choose a claim neither can settle alone and name a new observation that would help.

**My response**

---

---

### Exit

Tell the adult what you learned, which clue you used, your feedback and one next step. They use your answer to plan the next model or support.

**My exit response**

---

---

? Read it back: use a model and a matching clue to show what you know in science.

My feedback was... say what changed. Next I need to... name a fix.

### Word help

| Word     | Meaning                                       | Example                                          | My language |
|----------|-----------------------------------------------|--------------------------------------------------|-------------|
| evidence | a result or observation that supports a claim | A measured distance is evidence about a toy run. |             |
| force    | a push or pull on an object                   | Friction is a contact force.                     |             |
| rotation | a turn around an axis                         | Earth's rotation makes day and night.            |             |
| climate  | weather patterns over many years              | Climate is not the weather on one day.           |             |
