Lesson 3 planner

From charity facts to our plan

SoW Autumn 1 Week 5 · 40 minutes · GROW · Reading band 8–11

Teaching date: _____
Trial bake dates: _____ / _____ Review date: _____

Objective and evidence

Record what we learned from our charity partner; make one real project decision with a tool; write my own project plan.

Bank L3-E1 and L3-E2, with optional L3-E3. Project learning link: [QUAL]; [AWARD] unit awards: [QUAL]; [QUAL]. Books hold checked campaign facts and rehearsal. The class scorecard records a genuine project choice. Keep each learner's own contribution.

Slide and fixed stage	Min	Clock	Purpose
1. Title + big question	0	Before start	Big question ready
2. Arrival & regulation check	3	00–03	Private colour check and reset
3. Retrieval	5	03–08	Recall, word mat and checked facts
4. Today: objective + "I can" statements with evidence links	2	08–10	Objective and evidence links
5. I DO	6	10–16	Model a SMART decision target
6. WE DO	8	16–24	Live scorecard and hinge
7. YOU DO — in your book	5	24–29	Two own targets rehearsed in books
8. YOU DO — evidence capture (project sheet)	6	29–35	Individual project plan
9. Evidence check before hand-in	2	35–37	Check and improve the plan
10. Exit ticket	3	37–40	One target and first use
11. Key vocabulary mat (EAL)	0	Reference	Return to during timed stages
12. TA / staff brief	0	Hidden reference	Read before teaching

Total = 40 minutes. Title, vocabulary and staff slides add no minutes. Slide 12 is hidden. Use the mat during Retrieval and return to it as needed.

Teaching the real decision

Before the lesson

Bring each learner's original L2-E1 tools and L2-E2 decisions. Set a real model deadline. Have current ingredient prices, portion yields, time and equipment details ready. Agree an adult budget limit and safe feasible products before the live comparison. Leave all pupil decisions, scores and visitor recall blank.

Budget limit £_____ Cupcakes batch £_____ / ____ portions
Traybake batch £_____ / ____ portions Cost source/date: _____
Time/kit limits: _____ Adult check: _____

Retrieval and model

Use generic partner recall slots only if a prior contact occurred. Otherwise use the verified fact strip. Check memories before they become campaign facts. A learner can use the verified strip without recalling a visit. Pre-teach the picture mat words. Read SMART aloud and show the difference between a task and a choice.

Eight minutes for WE DO

1 minute: learners keep or change cost, time, easy portions and less packaging from the L2 example.

1 minute: read the actual cost, yield and time information. Cost per portion = batch cost ÷ portions. Do not invent prices.

3 minutes: score both products, 1 weak fit to 3 strong fit. Ask for evidence. For cost, cheaper per portion scores better if all else is suitable.

1 minute: total and agree. For a tie, use a learner-chosen priority or check one missing fact.

1 minute: each learner gives their own recommendation; record the group result and the project teacher's next purchase action.

1 minute: hinge check, with a brief re-model if needed.

Outcome: _____ Tool: _____ Learner reason: _____
Shopping action: _____ Any change and reason: _____

Hinge and response

A "Bake cakes" = task. B "By [date], use a scorecard to choose between two cake types" = decision target. Wrong answers: A because it is useful; both because both involve cakes; B because it uses an action word. Ask for the options, tool and deadline. If any learner is unsure, re-model and use the poster parallel check in the notes.

Record each learner's own recommendation. A real purchase waits for adult safety and budget checks.

Assessment and independent ownership

SoW accreditation links: Project learning link: [QUAL]; [AWARD] unit awards: [QUAL]; [QUAL]. Owner ruling dated 22 October 2026.

What the evidence shows

L3-E1 records a personal target, reason, tool, difficulty, support and resources. L3-E2 records a second target and the shared review point. Optional L3-E3 retains a third target.

Keep each learner’s dated project work and any spoken or scribed contribution together.

Project evidence check

The lesson task uses two personal targets, a reason for each and possible difficulties. Use tools from the learner’s earlier work. SMART is a classroom scaffold: specific, measurable, achievable, realistic and timebound. Include support, resources and a review point.

Book first and portfolio second

Book time prepares the two targets and every supporting prompt. Evidence time transfers short responses. SUPPORTED uses blank choice cards, read-aloud, scribing or a voice note. STANDARD uses the same plan with less prompting. STRETCH explains tool choice and may add a third target. Every route gathers the same project evidence.

Support may read, rephrase or scribe. It must never supply an assessed idea, target, tool, situation or reason. Record the support used, read back scribed words and authenticate any voice file. If work is incomplete, record a next step and provide time to finish.

Evidence storage

Record what each learner personally planned, said, wrote or contributed. Keep dated evidence and the support used. The named links guide evidence collection; this lesson does not claim completion of an award.

After the check, link each learner’s dated plan and the feedback/response in the evidence app. Keep visitor personal information out of public material.

Access support and project checks

SEND and EAL

SoW adaptation: “Structured roles, visual planners.” Source: GROW - Autumn!K22. This lesson adds one prompt at a time, a visual target frame, read-aloud, home-language rehearsal and choice of written, spoken or scribed response. These are access supports, not permission for an adult to choose the assessed content.

Offer a private BLUE/GREEN/AMBER/RED check, water, stretch, quiet seat or adult support. Agree a simple return step. Avoid personal stories about serious illness. A learner may work from the neutral fact strip or speak privately.

Lundy moments

Space: Think first. Respond in a book, by pointing, by speech, or privately to an adult. A pause and a return are allowed.

Voice: Learners propose factors and a real product choice. Each learner owns their targets, tools, reasons and help plan.

Audience: The project teacher hears the group recommendation as the adult responsible for the project and purchases. The assessor hears each individual plan.

Influence: The checked choice changes the trial-bake shopping list. The project teacher records what will be bought, or the exact safety/budget reason for a change. Each learner’s plan sets their next decision task.

AfL and feedback

Retrieval checks recall and sources. The hinge checks choice versus task. The evidence check finds missing plan parts. Exit checks the target and its first use. Three Cold Call questions: How is a decision different from a task? What makes a score of three fair? How will we know you met your target?

Use only VF, WS, I, NS, E, R. Working key: VF verbal feedback; WS with support; I independent; NS next step; E evidence linked; R learner response recorded. Confirm the local code key before marking. For R, hear the learner’s own response and record what changed.

Resources and project checks

Offer to the Communication portfolio

Speaking: explain a product choice and a personal target. Listening: respond to another learner’s reason during the scorecard discussion. Writing: record checked charity facts and personal targets. Presenting: share the group recommendation or an exit response. The other teacher can select these moments and map the evidence against her Communication booklet.

Resources and risk

Books; own L2 work; project evidence sheet; vocabulary/choice references; real cost/yield/time information; board or visualiser; timer; permitted staff device for individual voice capture. No pupil phone or board typing is needed. No cooking or tasting occurs in Lesson 3. Check allergies, recipes, facilities and budget before shopping.

Staff before-sale checklist for the later sale

☐ Food-safety training for handlers
☐ Ingredient and allergy checks
☐ Allergen labels on every item
☐ Display space agreed

This is the project’s required staff checklist. FSA says safe handling is required, but a food hygiene certificate is not required just to make/sell for a charity event. Legal allergen duties depend on food-business status; establish that status with the school lead. Keep ingredient information. FSA source and current redirect are in FACTS_LEDGER. No 14-allergen list is needed in Segment A.

Local coverage record

Public planning template · Complete from local records

Use local teaching records. A partner contact can be a visit, a call or checked written information. Do not assume this sequence has already happened in another setting.

SoW week	Delivered or planned	Reason	Effect on coverage
W1 need	Actual date/activity: _____	Reason for any change: _____	Coverage/evidence still needed: _____
W2 goal	Actual date/activity: _____	Reason for any change: _____	Coverage/evidence still needed: _____
W3 roles	Actual date/activity: _____	Reason for any change: _____	Coverage/evidence still needed: _____
W4 steps/resources	Actual date/activity: _____	Reason for any change: _____	Coverage/evidence still needed: _____
W5 partner	Actual date/activity: _____	Reason for any change: _____	Coverage/evidence still needed: _____
W6 early task	Actual date/activity: _____	Reason for any change: _____	Coverage/evidence still needed: _____
W7 evidence	Actual date/activity: _____	Reason for any change: _____	Coverage/evidence still needed: _____

Change from SoW and why

Verified SoW C178 says “Make first contact with a local partner/visitor.” This lesson can follow a partner contact or use checked written facts. It builds an individual project plan and records each learner’s contribution. Adapt the sequence to local teaching records. The SoW W4 wording is “Plan the steps and resources we need”; costing is the cake-sale application of that wider outcome.

Lesson 3 actual date: _____
Evidence checks completed: _____ / _____
Record checked by: _____ Date: _____
