TA studio brief — The local canvas: shapes and textures

Pathway: BASE · Week 1 Part 2 · Big question: What bold shapes and rough marks can we spot in big frames?

TA practical setup & focus

Tape rubbing plates to hard boards and peel wax crayons. First the lesson starts.

Studio kit: Structure photo cards, bumpy rubbing plates, peeled wax crayons, thick black pens, white paper

Key words to prompt

- beam: A long straight bar that holds up a frame.
- arch: A curved shape that goes across a gap.
- rough: Bumpy to touch, not flat or smooth.
- rubbing: Marks made by pressing wax over a bumpy card.
- edge: The outside line where a shape stops.

Supported route steps

1. Use a board with two bumpy plates taped down.
2. Rub a flat wax crayon across your page over both plates.
3. Use a wide ruler. Black pen to draw three straight bars.
4. Draw two cross lines to make triangles between the bars.

Check: Two neat rubbings made with bold black bars on top.

Review & exit support

Exit question: How do you get a crisp mark set from a bumpy plate?

Staff note: Staff preparation only: review a short demonstration of wax frottage over ridged and mesh plates.
