Knowledge organiser (BASE) — Surface texture skills lab

Pathway: BASE · Week 3 Part 2 · Big question: How can we use foil and dry brush marks to make card look like old metal?

Core studio focus

Family: Studio suite

Big question: How can we use foil and dry brush marks to make card look like old metal?

- Press lines. Bolt dots into soft craft foil over card.
- Brush a little pale paint lightly across dark bumpy card.
- Stick your best two metal-look squares into your studio log.

Essential vocabulary

- press: To press a raised bump or line into soft foil.
- dry brush: A brush with very little paint dragged lightly over bumps.
- metal: A hard shiny art tool like iron, steel, or tin.
- surface: The top layer of your card or foil.
- ridge: A long raised bump on a surface.

Three-step studio method

Step 1: Press foil on a soft mat: I put my foil square on a foam pad. Draw beam lines and bolt dots with a blunt stick.

Step 2: Load and wipe the dry brush: I dip the tip of a stiff brush in chrome paint. Then scrub most of it off on kitchen roll.

Step 3: Skim across dark ridged card: I sweep the brush lightly across black ridged card so only the top ridges turn chrome.
