TA studio brief — Plan and rehearse a studio skill demonstration

Pathway: TRACK · Week 6 Part 2 · Big question: How do we break a practical relief or surface technique into three teachable steps for peers?

TA practical setup & focus

Provide pre-cut 5 cm x 5 cm card and foil blanks so pupils can quickly assemble their Step 1, Step 2, and Step 3 exemplar tiles.

Studio kit: A3 three-step demonstration boards, small card/foil sample tiles, glue sticks, thick marker pens, cue cards, studio timers

Key words to prompt

• demonstration: Showing someone how a practical skill works step by step while explaining key tips.

• sequence: Putting actions in the exact 1-2-3 order needed for success.

• exemplar: A physical sample tile showing what each stage should look like.

• cue card: A short prompt card with bold keywords to guide your demonstration.

• troubleshoot: Warning learners about one common mistake and how to avoid it.

Supported route steps

1. Pick your favourite studio trick (foil pressing or chrome dry-brushing).

2. Glue three small sample squares into Step 1 (Start), Step 2 (Middle), and Step 3 (Finished) on your board.

3. Tick or write one short tip under each box.

4. Practise pointing to Box 1, 2, and 3 while telling your partner how it works.

Check: Three stage tiles mounted with tips and rehearsed once with a partner.

Review & exit support

Exit question: Why do we include a 'Step 2 (in-progress)' sample tile on a skill demonstration board?

Staff note: Staff preparation only: review a short guide on scaffolding peer-to-peer tabletop studio demonstrations.
