Teacher and cover plan — Deliberate practice and documented progression

Pathway: SUMMIT · Week 2 Part 1 · Big question: How do we use structured three-stage deliberate practice to master a target skill and document progression?

Learning goals and studio kit

• Take your #1 target from your Week 1 audit and design a three-stage deliberate practice sequence.

• Execute three progressive studies testing specific variables (hand pressure, cross-contour direction, or wash dilution).

• Write technical diagnostic annotations between each study documenting how you corrected errors and refined control.

Studio kit: Week 1 audit sheets, A3 three-stage deliberate practice boards, 2B-6B graphite, fineliners, ink wash palettes, oil pastels, blending tools

Arrival and starter

Arrival: Look at your Week 1 baseline audit. What separates 'mindless repetition' from 'deliberate studio practice'?

Starter question: Why do we change only ONE technical variable at a time between Study 1 and Study 2?

Teacher model (I do)

Step 1: Execute study 1 and write Diagnostic 1: I complete Study 1 of my symbolic vessel in ink wash, then note: 'Issue: harsh tide mark in mid-tone. Adjustment: damp-brush feathering.'

Step 2: Apply the variable fix in Study 2: In study 2, I use a clean damp brush to feather the edge of the wet wash, eliminating the harsh step.

Step 3: Resolve full 5-value range in Study 3: In study 3, I combine the feathered mid-tone with a deep second glaze in the core shadow and annotate the progression.

Practice routes (Supported / Independent / Aspire)

Supported: Three progressive studies completed with bridge adjustments ticked and summary written.

Independent: Three progressive studies, two diagnostic bridge notes, and a concluding technical synthesis.

Aspire: Three progression studies, fourth mixed-media stress test, and analytical evaluation.

TA and cover notes

TA focus: Display a 3D cylinder/sphere with elastic bands wrapped around its curves so pupils can see how cross-contour lines curve across a form.

Staff prep: Staff preparation only: review a short demonstration of cross-contour shading and damp-brush wash feathering across three progressive trials.
