Teacher and cover plan — Drafting a structured visual review

Pathway: SUMMIT · Week 7 Part 1 · Big question: How do we synthesise our exhibition field sketches and portfolio evidence into a structured critical review?

Learning goals and studio kit

• Synthesise your Week 6 exhibition field sketches into a structured four-part Critical visual Review.

• Support every critical judgement by citing specific visual evidence (compositional tonal structure, material execution, and curatorial lighting).

• Sequence and present your complete 7-week Identity & Studio log portfolio alongside your finished review.

Studio kit: Week 6 completed Gallery inquiry sheets, Weeks 1-4 portfolio boards, A3 Critical review presentation sheets, fineliners, mounting card, glue sticks

Arrival and starter

Arrival: What separates a genuine 'Critical visual Review' by an art student from a casual online star rating?

Starter question: In a critical art review, why must every analytical claim be paired with a specific visual example from your Week 6 field sketches?

Teacher model (I do)

Step 1: Mount and cross-reference my Week 6 field sketches: I mount or transcribe my strongest Week 6 spatial and tonal studies onto the visual column of my A3 Critical review board with numbered reference tags [Fig. 1, Fig. 2].

Step 2: Draft the four evidence-based review sections: I write Sections 1 to 4, citing [Fig. 1] when evaluating the raking light shadows and [Fig. 2] when analysing the 5-value figure-ground contrast.

Step 3: Sequence the complete 7-week portfolio: I assemble my full portfolio in sequence (W1 Audit -> W2 Deliberate practice -> W3 Practitioner study -> W4 Resolved piece -> W5-7 Exhibition inquiry & Review).

Practice routes (Supported / Independent / Aspire)

Supported: Sketch mounted, four review sections completed with pointer arrow, and portfolio sequenced.

Independent: Cross-referenced four-part critical review completed and full 7-week portfolio audited.

Aspire: Three-figure critical review essay and indexed 7-week portfolio with executive synthesis.

TA and cover notes

TA focus: Provide pre-printed '[Fig. 1]' and '[Fig. 2]' callout stickers so pupils can cleanly cross-reference their Week 6 field sketches inside their written paragraphs.

Staff prep: Staff preparation only: review how to model cross-referencing observational gallery sketches inside a structured four-part critical review.
