TA studio brief — Delivering the workshop and curating the exhibition

Pathway: SUMMIT · Week 7 Part 2 · Big question: How do we facilitate our live peer studio workshop and curate the collective structural installation?

TA practical setup & focus

Organise a two-round carousel (6 mins Round A leaders, 6 mins Round B leaders) followed by a 10-minute collective gallery hang and lamp-angling ceremony.

Studio kit: Finished structural relief panels, upgraded Workshop leadership Boards, participant blank kits, directional gallery lamps, museum labels, evaluation sheets

Key words to prompt

• facilitation: Guiding participants through a creative process with clear demonstrations, safety checks, and encouraging technical cues.

• collective installation: Grouping individual relief panels and workshop tiles into a unified architectural display.

• raking illumination: Setting gallery spotlights at a shallow grazing angle across the hung exhibition wall.

• curatorial statement: The overarching wall text that explains the shared brief, material constraints, and structural theme.

• summative evaluation: A final reflective assessment of both your practical installation and your workshop leadership.

Supported route steps

1. Use your upgraded 3-tile board to guide a partner or small group through making their sample tile.

2. Hang your main relief panel on the display row with your museum label and place your group's tiles underneath.

3. Collect one praise slip from your participant and glue it onto your evaluation sheet.

4. Complete the final reflection stems on your Studio suite sheet.

Check: Workshop delivered, relief panel and participant tiles displayed, and evaluation sheet completed.

Review & exit support

Exit question: Why does exhibiting the small tiles made by your workshop participants alongside your main relief panel strengthen the final showcase?

Staff note: Staff preparation only: review how to coordinate the final studio workshop carousel and collective raking-light exhibition hang.
