Food Jobs Mission · Knowledge Organiser

Learning goal: I can sort foods by their job and build a balanced plate with water.

Today I Can

I can sort food cards into Go (energy), Grow (mend), and Keep well.

I can pick foods from each group to build a balanced meal.

I can explain why my meal needs each food group and water.

Must-Know Words

balanced meal: a meal with foods for energy, growth, and staying well

carbohydrate: starchy food like bread, rice, pasta, or oats that gives energy

protein: food like beans, eggs, fish, or meat that builds and mends muscle

vitamins: things in fruit and veg that help keep our body well

Core Science Steps

Look at Plate 1. Pasta gives energy (Go), beans mend muscle (Grow), and broccoli keeps us well.

Now look at Plate 2. It has crisps and sweets, so it misses Grow food and fruit or veg.

We can fix Plate 2 by swapping in a starchy food, a

protein food, veg, and water.

Keep the Science Clear

Check the job of each food on the plate: Go (energy), Grow (mend), and Keep well (vitamins).

A balanced meal does not mean every plate looks identical; many safe foods can do each job.
