Food Jobs Mission · Teacher and Cover Plan

Learning goal: I can sort foods by their job and build a balanced plate with water.

Scheme Outcome

BASE Science scheme of work, Unit 1 (Skeletons, Muscles and Nutrition), Topic: Sort everyday foods by their role in a balanced meal and plan a balanced plate.

Sort everyday foods into energy (carbohydrates), growth and repair (proteins and dairy), and health (fruit and vegetables), and build a balanced meal.

Success Criteria

I can sort food cards into Go (energy), Grow (mend), and Keep well.

I can pick foods from each group to build a balanced meal.

I can explain why my meal needs each food group and water.

Model Sequence (I do)

Look at Plate 1. Pasta gives energy (Go), beans mend muscle (Grow), and broccoli keeps us well.

Now look at Plate 2. It has crisps and sweets, so it misses Grow food and fruit or veg.

We can fix Plate 2 by swapping in a starchy food, a protein food, veg, and water.

Different people can build a balanced plate using

different foods they enjoy.

For example, Grow food can be beans, lentils, tofu, eggs, fish, or meat.

What matters in science is that all three body jobs plus water are covered.

We Do & Hinge Check

Why are sweets and crisps kept as small occasional foods instead of the main plate?

Answer: A. Everyday meals need starchy energy foods, protein to grow, fruit and veg to keep well, and water.

Safe Practical & Card Setup

Use the printed food cards and balanced plate mat to design a meal covering all three jobs.

Kit: Printed food cards, 3-part Balanced Plate mat (Go / Grow / Keep well + Water), and word strips.

Use paper cards only. Respect everyone's food needs and allergies; never judge anyone's lunch.

You Do Routes (Supported, Independent, Aspire)

Supported: Place four food cards on the plate mat so every section is filled, then label Go, Grow, and Keep well. (Help: Section 1 = rice or bread. Section 2 = beans, egg, or fish. Section 3 = fruit and veg.)

Independent: Choose one Go food, one Grow food, two Keep-well fruit/veg foods, and a drink. Write the job of each item in your book. (Help: I picked __ for

energy, __ to grow and mend, __ to keep well, and __ to drink.)

Aspire: Repair an unbalanced meal (pasta, bread, and fizzy drink) and explain the scientific job of each swap you make. (Help: Keep pasta for __, swap bread for __ to mend muscle, add __ for vitamins, and swap fizzy drink for __.)
