Model Plate Comparison · Knowledge Organiser

Learning goal: I can compare two meal plates and make food swaps so a plate matches the guide.

Today I Can

I can check Plate A and Plate B against the balanced plate guide.

I can spot which food group is missing or too big on a plate.

I can pick a sensible food swap and say how it fixes the plate.

Must-Know Words

compare: to look at two things side by side to see what is the same and different

swap: to trade one food for another food that fits the missing job

missing group: a food group on the guide that is not on the plate yet

balanced: having the right mix and share of each food group

Core Science Steps

First, tick the checklist for Plate A: potato (starch), beans (protein), salad (veg), yoghurt (dairy), water.

Next, tick Plate B: chips (starch) and sausage (protein), but 0 veg, 0 dairy, and sugary pop.

Finally, make two swaps on Plate B: swap half the chips for peas and swap fizzy pop for water.

Keep the Science Clear

Use a side-by-side tick table so anyone can see why Plate A is balanced and how to fix Plate B.

Do not just say 'healthy' or 'unhealthy'; name the exact food group that is missing or swapped.
