Food Sources · TA Brief

Learning goal: I can say if a food comes from a plant or an animal and group animals by what they eat.

Watch (staff preview first)

Short silent teacher demonstration clip for this lesson's model and practical sequence · preview before class use.

Adult Support Routine

No cold calling; nobody is asked to read difficult text aloud.

Give time to start -> point to the relevant place -> rephrase -> offer a small prompt or word bank -> reduce to a limited choice.

Beside the You do in the pupil book, mark I (independent), S (supported) or C (choice).

Must-Know Words

source: where something starts or comes from, like a plant or an animal

herbivore: an animal that eats only plants

carnivore: an animal that eats only other animals

omnivore: an animal that eats both plants and other animals

Key Answers

A. Every food traces back to a living source: a plant, an animal, or both.

A. Berries and roots are plants, and fish are animals, so the bear eats both (omnivore).

1. A plant. 2. Rabbit, cow, sheep, or deer. 3. Its food clues include both plant foods (like berries or seeds) and animal foods (like worms, insects, or fish).
